

A MENTORSHIP IN 12 CHAPTERS · MOZAMBIQUE EDITION 2026

From Zero to #1

*Build a high-ticket business from your laptop,
and become the name Mozambique's suppliers trust.*

Foundations · Build your business · Win clients · Deliver and grow
12 challenges · 36 quiz questions · XP and 5 levels · Portuguese scripts

Your mentor: Claude

Written for you · Maputo · October 2026

From Zero to #1

A mentorship for building a high-ticket business in Mozambique, from your laptop, with honest numbers and real challenges.

Your mentor: Claude (an AI). **Written for:** you, starting from zero.

Edition: Mozambique, October 2026.

Read this first. The market facts in this book (projects, laws, prices, platforms) were researched in October 2026. Things marked 'check this' were not fully verified. Laws and fees change, so confirm them at the source before you quote them to a client. This book teaches business skills. It is not legal, tax or financial advice; for those, talk to the tax authority (AT) or a qualified professional.

How this mentorship works

Every chapter follows the same loop. Don't skip the doing: reading without action changes nothing.

- 1 Read.** Each chapter teaches one part of the business from zero, with Mozambican examples.
- 2 Do.** Finish the challenge at the end of the chapter. Tick each step as you go: the boxes are clickable.
- 3 Prove.** Save the proof the challenge asks for, or paste it into your chat with me. I'll review it.
- 4 Level up.** Add the XP to your tracker at the back. Five levels take you from Apprentice to Market Leader.

Level	Name	XP	What it means
1	Apprentice	0–400	You've set up, learned the market and spotted the traps.
2	Operator	401–900	You have an offer, proof and a working toolkit.
3	Closer	901–1,500	You find leads, start conversations and run sales calls.
4	Specialist	1,501–2,200	You deliver professional work and build your reputation.
5	Market Leader	2,201+	People recommend you by name. You run yourself like a company.

A NOTE FROM YOUR MENTOR

I can't make you rich in 24 hours, and anyone who promises that is selling you something. What I can do is teach you, step by step, how to build something real: a business that companies trust and pay well. You bring the effort and the honesty. I'll bring everything I know. Deal?

— your mentor

PART 1

Foundations

Who you are becoming, how money really works, and the market that needs you.

- 01 Day Zero: How This Mentorship Works
- 02 How Money Really Works (and the Traps That Eat Beginners)
- 03 Your Market: Gas, Mining and the Companies That Need You

Day Zero: How This Mentorship Works

Who you are today, who you will become, and the honest rules of our work together

IN THIS CHAPTER YOU WILL

- Describe who you are today and the specialist you will become.
- Explain the honest money picture, including how long companies take to decide.
- Use the book's system of parts, challenges, XP and levels.
- Work safely with Claude as a co-worker, checking every fact before sending.
- Set up a daily and weekly operating rhythm.

Welcome. From today, I am your mentor. I am Claude, an AI, and I will work next to you on every step of this journey. Let me be honest from the first page. You are 24. You have a laptop, strong English and Portuguese, some web skills, and you are good with people. You have no clients, no contacts, no portfolio and no budget. That is not something to hide. It is simply where we start. In this book I will teach you one clear job: helping Mozambican companies get ready to win contracts in the gas and mining supply chain. You will learn it step by step, the way I would teach a younger brother or sister. I will not sell you a dream. Some days will feel slow. Some people will say no. But if you do the work in these pages, with honesty and consistency, you can build a real business that serious companies respect. This chapter explains how we will work together. Read it slowly. Then build your command centre.

— your mentor

1.1 Where you start, and where you are going

Today you are a beginner. You have never had a client, never written a proposal (proposta) and never been on a sales call (chamada de vendas). Good. Beginners who know they are beginners learn fast, because they follow a method instead of guessing. And your strengths are real: you write and speak Portuguese and English well, you can build simple web pages, and you are not afraid to talk to people.

Here is who you will become: **the go-to supplier-readiness specialist in Mozambique**. A supplier (fornecedor) is a company that sells goods or services to another company. Supplier readiness (prontidão de fornecedor) means a company has everything a big buyer asks for: the right documents, a clear profile in Portuguese and English, a professional online presence and a correct registration on supplier portals. Your positioning line is the one sentence that explains what you do. Here it is: **O estúdio de prontidão de fornecedores para a cadeia do gás e da mineração de Moçambique**. In English: the supplier-readiness studio for Mozambique's gas and mining supply chain.

EXAMPLE

What the job looks like

Imagine a fictional company called Lufo Logística in Pemba. It has 40 workers, 12 trucks and a real office. It wants work from the gas projects in Cabo Delgado. But it has only a Facebook page, a Gmail address and no company profile in English. When a big buyer searches for it, they find almost nothing. You arrive with a finished bilingual capability statement (perfil de capacidades: a short document that shows what a company can do), a document checklist and guided registration on the free supplier portals. That is our **Portal-Ready** pack, 25,000 MT. You cannot promise that Lufo Logística will win a contract. But now it is ready to compete. That is your job.

A NOTE FROM YOUR MENTOR

I chose this path for you because it matches what you already have. You do not need an engineering degree. You need languages, care, speed and honesty. Languages you have today. Care and honesty are choices you make every day. Speed comes with practice, and we will build it together.

— your mentor

1.2 The honest money truth

Let us talk about money with clear eyes. This is not a get-rich-quick plan. Our main product, the **Supplier-Ready** pack, costs 65,000 MT (about USD 1,015, at about 64 MT to 1 USD). One sale is a lot of money in Mozambique. Compare it with the 2026 sector minimum wages (salário mínimo) per month.

Putting one sale in context

Reference	Amount
Agriculture minimum wage	7,072 MT per month
Hospitality minimum wage	10,600 MT per month
Banks and insurance minimum wage	20,361 MT per month
One Supplier-Ready sale	65,000 MT

But big money comes slowly. Companies do not decide in one hour. A director must think, talk to a partner (sócio) and check the budget. Expect days or weeks between your first message and the deposit.

Our ambitious Day-30 target is 270,000 MT per month (about USD 4,220): three Supplier-Ready packs (195,000 MT) plus five Monthly Growth Retainers (75,000 MT). A retainer (avença mensal) is a fixed monthly fee for ongoing work. This target is possible, not guaranteed. It depends on doing your outreach every working day. Chapter 12 shows a slower, more typical path: a first deposit in month 1 and a first retainer by months 3-4. Plan your life on the slow path; work towards the fast one.

WATCH OUT

I cannot promise you any income, and nobody honest can. If someone guarantees you money, protect yourself: that is how scams talk. What I can give you is a method. Your results depend on how many companies you contact, how well you deliver and how long you keep going.

1.3 How this book works

- The book has **4 parts** and **12 chapters**. Part 1 builds your foundations.
- Every chapter opens with a short note from me and clear learning goals.
- Then come the lessons, with examples, Portuguese scripts and warnings.
- Every chapter ends with a **challenge** that gives you XP (experience points). XP measures real actions, not reading.

- Each chapter has a 3-question quiz. The answers are at the back of the book.
- Each chapter ends with a short glossary of key terms in English and Portuguese.

Your five levels

Level	XP	What it means
Apprentice	0-400	You are learning the basics
Operator	401-900	You run outreach every day
Closer	901-1,500	You turn calls into deposits
Specialist	1,501-2,200	Clients return and refer you
Market Leader	2,201+	Companies know your name

TIP

Do the challenge before you start the next chapter. Reading without action gives zero XP. A good rhythm: read a chapter in the evening, then start the challenge the next morning.

1.4 Claude is your co-worker

We work as a team. You are the face of the business and the final checker. I am the fast drafter. The rule is simple: **you paste facts, I draft, you check everything before sending.** I write good Portuguese and English quickly, but I can make mistakes, and I do not know facts you have not given me.

The five prompts you already have

- **P1:** a mini-audit plus a free, professional English 'About us' paragraph for a company you want to contact.
- **P2:** the content of a capability statement.
- **P3:** adapting the demo website for a real client.
- **P4:** a proposal built from your call notes.
- **P5:** translation with a glossary, so key terms stay the same everywhere.

The safe co-working routine

- 1 Collect public facts about the company: website, Facebook page, job ads.
- 2 Paste the facts into a chat with the right prompt (P1 to P5).
- 3 Read my draft slowly, from start to end.

- 4 Check every name, title, number, date and document against the source.
- 5 Remove anything you cannot prove, and adjust the tone so it sounds like you.
- 6 Send it yourself, from your own account.

WATCH OUT

Never paste client passwords, PINs, SMS codes or bank details into any chat. When you help a client register on a portal, the client types the password. Also, never let a draft add capabilities, years or projects the client does not really have. In procurement (aquisições: how big companies choose and buy from suppliers) that is misrepresentation. It can destroy their reputation and yours.

1.5 Your toolkit and your daily rhythm

Files you already have

- **high-ticket-sprint.pdf**: your 24-hour plan for the main offer.
- **A demo bilingual website** for the fictional company 'Exemplo Engenharia & Serviços, Lda', with a PT/EN switch and a WhatsApp quote form. Publish it free with Netlify Drop: drag the folder to app.netlify.com/drop, then claim it with a free account.
- **A 4-page sample capability statement PDF**, clearly labelled as a fictional sample.
- **scripts-high-ticket.md**: messages H1 to H9 and prompts P1 to P5.
- **escalepay-and-number-one.pdf**: the EscalePay verdict. We study it in Chapter 2.
- **24h-cash-sprint.pdf**: a backup plan for fast, smaller income (CVs, WhatsApp Business setups).

Your working day, once you are running

Block	What you do
Morning deep work	Client delivery, phone away
Late morning	20 value-first outreaches
Afternoon	Calls and follow-ups
30 minutes	Learning
End of day, 10 minutes	Update tracker, plan tomorrow

Two words from the table. **Deep work** (trabalho focado) means working on one important task with no phone and no messages. **Value-first outreach** (prospecção com valor primeiro) means your first message gives the company something useful for free, such as a professional English

'About us' paragraph, before you ask for anything. Outreach (prospecção) simply means contacting companies that do not know you yet.

Once a week, on Friday, you hold a **CEO hour**. A CEO (director executivo) is the person who decides the direction of a company. In your business, that is you. Sit with your tracker and ask: how many outreaches, replies, calls, proposals and deposits did I have this week? What worked? What will I change next week? Finally, set the greeting below in WhatsApp Business. In English it says: thank you for your message; I help Mozambican companies prepare profiles and documents in Portuguese and English; I will reply as soon as possible.

SCRIPT · COPY, PERSONALISE, SEND

Your WhatsApp Business greeting message

Olá! Obrigado pelo seu contacto. Sou [o seu nome], do estúdio de prontidão de fornecedores para a cadeia do gás e da mineração de Moçambique. Ajudo empresas moçambicanas a preparar perfis de empresa e documentos de fornecedor em português e inglês. Responderei com a maior brevidade possível.

1.6 The mindset that wins in a small market

- **Reputation compounds.** The business world in Pemba, Maputo or Nacala is small. Directors talk. One honest, excellent job brings the next one. One lie can close many doors.
- **Consistency beats intensity.** Twenty good outreaches every weekday beat two hundred in one crazy night and then nothing for a week.
- **Rejection is data.** A 'no' tells you something about your message, your list or your timing. Write it in the tracker and learn. A 'no' is also final: never chase someone who said no.
- **'At all costs' means maximum effort, never faking.** Work hard, learn fast, follow up. But no fake reviews, no invented clients, no operator logos used as if they were your clients, no bribes.

Work hard enough to be proud of it. Stay honest enough to sign it.

KEY TAKEAWAYS

- ✓ You start from zero, but your languages, web skills and people skills are real assets.
- ✓ One Supplier-Ready sale is 65,000 MT, and companies decide in days or weeks.
- ✓ 270,000 MT per month is an ambitious target, never a promise.
- ✓ You paste facts, Claude drafts, you check every name and number.
- ✓ Twenty value-first outreaches every weekday, reviewed every Friday.
- ✓ Maximum effort, zero faking.

CHALLENGE 01**+100 XP**

Build Your Command Centre

A professional business needs a professional base. Today you set up the tools you will use every single day: email, folders, tracker and WhatsApp. You also write down why you are doing this, so you remember on the hard days.

Time box: 2 hours **Reward:** 100 XP

YOUR MISSION, STEP BY STEP

- ☐ Create a new, professional Gmail address (for example, your first and last name) and add a signature with your name, role, phone (telemóvel) number and the positioning line.
- ☐ Create a Google Drive folder system with five folders: 00-Admin, 01-Leads, 02-Clients, 03-Templates, 04-Proof, and move the files you already have into 03-Templates.
- ☐ Create a Google Sheet tracker called 'Pipeline' with these columns: Company, Sector, City, Contact, Money signals, Gap signals, Date contacted, Follow-up day 3, Follow-up day 7, Status, Next action.
- ☐ Install WhatsApp Business (free), then add a short profile description, your working hours and the greeting message from this chapter.
- ☐ Write your 'why' (5 to 10 honest lines) and one 90-day goal based on actions you control, such as outreaches sent, and save it in 00-Admin.
- ☐ Take a screenshot of each step and save it in 04-Proof.

Proof: Screenshots of your Gmail signature, your five Drive folders, your Sheet headers and your WhatsApp Business profile, plus the text of your 'why' and 90-day goal. Send them to Claude for feedback and keep them in 04-Proof.

Bonus (optional, harder): Publish the demo website with Netlify Drop, claim it with a free account, and add the link to your signature, clearly labelled as a demo for a fictional company.

☐ **Challenge complete.** Date: _____ XP added to the tracker

QUICK QUIZ · CHAPTER 1

1. How much does one Supplier-Ready pack cost?

- A** 1,500 MT
- B** 25,000 MT
- C** 65,000 MT
- D** 270,000 MT

2. Claude drafts an email for a company. What do you do before sending it?

- A** Send it at once, because the draft is fast
- B** Check every name, number and fact against the source, then send it yourself
- C** Send it and ask the client to correct any mistakes

3. You have 1,000 XP. What is your level?

- A** Operator
- B** Closer
- C** Specialist
- D** Apprentice

Answers are at the back of the book. Check yourself only after you've answered all three.

How Money Really Works (and the Traps That Eat Beginners)

The simple machine of a real business, and how to protect yourself from scams

IN THIS CHAPTER YOU WILL

- Explain the money chain from value to referrals.
- Tell the difference between revenue, profit and cash.
- Calculate simple funnel math for one 65,000 MT sale.
- Recognise the most common scams and payment tricks in Mozambique.
- Test any online platform in 30 minutes before you trust it.

Before you earn your first metical from a client, I want you to understand how money really moves in a business. Most beginners skip this. They think business means 'find a buyer, get paid'. Then they are surprised when a client pays late, when costs eat the profit, or when a 'great opportunity' takes their savings. The traps are real. Banco de Moçambique, the central bank, has warned the public about pyramid schemes, unlicensed schemes that collect money through social media, and fake financing offers that ask for fees up front. Anyone who wants money fast is an easy target, and you want to grow fast. So you need strong defences. This chapter has two halves. First, the simple machine of a real business: how value becomes money, and why selling to companies fits you. Second, the traps, and a method to check any platform before you trust it with a single metical. Learn both. One builds your income. The other protects it.

— your mentor

2.1 The money chain

Every real business follows the same chain. If money is not arriving, one link is broken. Learn the links in order.

- 1 **Value:** a problem you solve. Your clients cannot present themselves well to big buyers.
- 2 **Offer** (oferta): a clear package that solves the problem, like Portal-Ready or Supplier-Ready.
- 3 **Price** (preço): what the offer costs, with clear payment terms.
- 4 **Leads** (potenciais clientes): companies that might need the offer.
- 5 **Conversations:** replies, WhatsApp messages and 15-minute calls.
- 6 **Proposals** (propostas): a one-page written offer, sent within 30 minutes of the call.
- 7 **Deposits** (sinal): 50% paid before you start.
- 8 **Delivery** (entrega): finished work, on time, then the other 50%.
- 9 **Referrals** (recomendações): happy clients send you new clients.

TIP

When a week goes badly, do not say 'business is bad'. Find the broken link. Many calls but no deposits? Look at your proposals. No replies? Look at your outreach message and your list of companies.

2.2 Revenue, profit and cash are not the same

Beginners mix up three words. **Revenue** (receita) is the money from your sales. **Profit** (lucro) is revenue minus your costs. **Cash** (dinheiro disponível) is the money really in your account today. Cash flow (fluxo de caixa) is how money moves in and out over time. You can have high revenue and still have no cash, if clients have not paid yet. Taxes also reduce profit. Small taxpayers can use a simplified tax called ISPC, but its current rates and limits are UNVERIFIED: ask the tax authority (AT) or an accountant before you plan with them.

EXAMPLE

Imagine a fictional company called Maré Construções in Nacala buys Supplier-Ready for 65,000 MT. Our terms are 50% to start and 50% on delivery. On day 1 you receive a deposit of 32,500 MT. You deliver in 7 days, but the director travels and approves the work two weeks later. Only then does the second 32,500 MT arrive. Imagine your costs that month were 3,000 MT for internet data and transport (made-up numbers for practice). Revenue: 65,000 MT. Profit before tax: 62,000 MT. But for two weeks, your cash from this client was only 32,500 MT.

Word	Question it answers	In the example
Revenue	How much did I sell?	65,000 MT
Profit	What is left after costs?	62,000 MT
Cash	What is in my account now?	32,500 MT, later 65,000 MT

A NOTE FROM YOUR MENTOR

This is why I insist on the 50% deposit. It protects your cash and shows the client is serious. Our guarantee is fair to both sides: if the client does not approve the first draft, you refund the deposit. A client who refuses any deposit wants you to take all the risk. Treat that as a warning sign, and never start full work without it.

— your mentor

2.3 Why high-ticket B2B fits you

B2B means business-to-business (empresa para empresa): you sell to companies, not to individuals. High-ticket (alto valor) means each sale is large. Look at the maths. Our cheapest paid product, the Kit Fornecedor Pronto, costs 1,500 MT. To earn the same as one Supplier-Ready sale of 65,000 MT, you would need to sell about 44 kits. Finding 44 buyers is much harder than finding one company with a real reason to buy.

- **Fewer sales needed.** One or two good clients can change your month.
- **Companies have budgets and a reason.** A contract in the gas supply chain can be worth far more than your fee.
- **Your skills fit.** Bilingual writing, web skills and confident talking are exactly what this work needs.
- **Payments are cleaner.** Companies usually pay by bank transfer and want a factura/recibo (invoice/receipt) with your NUIT, your tax number. That builds a professional record.

2.4 Funnel math and pricing by value

A funnel (funil de vendas) shows how many contacts you need at the top to get one sale at the bottom. Many companies hear from you, fewer reply, fewer talk to you, and a few buy.

EXAMPLE

An illustrative funnel for one sale

This example is to help you think. It is not a statistic. Forty value-first outreaches might bring a few replies, perhaps 4. Those replies might lead to 2 calls. The 2 calls might give 1 accepted proposal: one Supplier-Ready at 65,000 MT, with a 32,500 MT deposit. At 20 outreaches per weekday, 40 outreaches is two days of work. For the ambitious 270,000 MT month (3 Supplier-Ready packs plus 5 retainers), this funnel must work several times. Retainers are easiest to sell to clients who are already happy with your work.

WATCH OUT

These ratios are invented for practice. Your real numbers will be different, maybe better, maybe worse. From your first outreach, record every number in your Google Sheet. After 100 outreaches, your own data will teach you more than any book.

Now price. Do not price by hours. Price by **value**: what the result is worth to the client. Still, check your price against the market. Public website price lists in Mozambique are low: Descodando 5,000-35,000 MT and WebSimples 9,000-25,000 MT. If you say 'I make websites', clients compare you with those lists. So we sell **readiness for contracts**, not web pages.

TIP

If a client says your price is too high, do not cut it. **Downsell** (oferecer um pacote menor): offer a smaller package, for example Portal-Ready at 25,000 MT instead of Supplier-Ready. The price stays honest; only the scope (âmbito: what is included) gets smaller.

2.5 The traps that eat beginners

Banco de Moçambique has warned about pyramid schemes and unlicensed deposit-taking through social media and Forex. In January 2026 it denounced fraudulent financing and donation schemes that demand upfront payments. Cybercrime cases rose 16% in 2024, to 1,051 cases. Learn the common patterns below.

Money traps

- **Pyramid schemes** (esquemas em pirâmide): you earn mainly by recruiting people, not by selling a real product.

- **Task scams** like 'MZM': 'pay 500 MT to unlock tasks, earn 10,000 MT'. You pay; the big money never comes.
- **Forex and crypto 'signals'**: groups that promise profits if you send money to a 'trader'.
- **Betting affiliates and 'renda extra' hype**: easy-money promises built on other people's losses.
- **'Make money online' courses** sold by people whose main income is selling the course.
- **Fake job offers** that ask you to pay a fee before you start.
- **Fraudulent financing or donations** that ask for an upfront 'fee' to release a loan or a grant.

Payment tricks

- **Fake receipts**: a screenshot of a payment that never happened. Always confirm in your own app or SMS.
- **'I sent money by mistake, send it back'**: check your real balance. Usually nothing arrived.
- **Overpayment refund**: they 'pay' too much and ask you to return the difference.
- **PIN or SMS code requests**: never share them. Not with a client, not with 'the operator', not with anyone.
- **Crypto 'fees to receive'**: if a foreign client pays in USDT, check the transaction yourself on the blockchain explorer, and never pay a fee to receive.

Red-flag checklist

- You must pay to receive, unlock or release money.
- Income is guaranteed.
- You earn mainly by recruiting other people.
- You are pushed to decide or pay today.
- There is no clear legal company or licence you can check.
- A private number collects money for a 'company'.
- Someone asks for your PIN or SMS codes.
- A screenshot is the only proof of payment.

WATCH OUT

If even one flag is a 'yes', stop. Do not pay, do not share codes, and never send money 'back' yourself. If someone says they sent you money by mistake, reply with the message below. In English it says: I checked my account and received nothing; if you sent money by mistake, please contact your operator to reverse the transaction.

SCRIPT · COPY, PERSONALISE, SEND**If someone says they sent you money by mistake**

Boa tarde. Verifiquei a minha conta e não recebi nenhum valor. Se enviou dinheiro por engano, por favor contacte a sua operadora para reverter a transacção. Obrigado.

2.6 Case study: how we checked EscalePay

EscalePay is a young, Mozambique-facing checkout for digital products (courses, e-books, PLR, mentorships) with affiliates. Its pitch is 'receive the same day in e-Mola or M-Pesa'. We did due diligence (diligência prévia): careful checking before trusting.

What we found

- Fee claims conflict: 10% per sale on escalepay.com, but 8% + USD 0.50 on gruposcale.com.
- The footer names GRUPO DIGITALIZE LLC at a Wyoming (USA) registered-agent address used by 200,000+ companies.
- One snippet names 'Escale Network, Lda' in Mozambique, which we could not verify.
- No Banco de Moçambique licence found, and no independent reviews or complaints found.
- 'Make money online' style marketing. Similar Brazilian names (EscalaPay, SkalePay) are different companies.

Our verdict: OK to test for a small digital product, such as the 1,500 MT Kit, if you withdraw your money after every sale. Never use it for B2B deals; your companies pay by bank transfer. The best part is the method. You can reuse the same test for any platform.

The 30-minute platform test

- 1 Open an account and screenshot the fee page.
- 2 Ask support in writing about the fee, the legal entity, which licensed entity collects the money, and refunds after withdrawal.
- 3 Make a 50 MT test sale paid with your own M-Pesa, and read the merchant name on the SMS.
- 4 Check Banco de Moçambique's list of authorised payment institutions.
- 5 Compare one alternative, for example Lojou (10% + 10 MT, 48h payout, claimed), FambaPay (10% + processor fees, claimed) or PaySuite (about 6% via M-Pesa, according to a third-party blog).

SCRIPT · COPY, PERSONALISE, SEND**Written question to platform support**

Bom dia. Antes de começar a vender, preciso de confirmar por escrito: 1) Qual é a taxa exacta por venda? 2) Qual é a entidade legal que opera a plataforma? 3) Que entidade licenciada pelo Banco de Moçambique recebe o dinheiro? 4) Como funcionam os reembolsos depois de eu levantar o dinheiro? Com os melhores cumprimentos.

KEY TAKEAWAYS

- ✓ Money moves through a chain: value, offer, price, leads, conversations, proposals, deposits, delivery, referrals.
- ✓ Revenue is not profit, and profit is not cash.
- ✓ One 65,000 MT sale equals about 44 kits at 1,500 MT, so sell to companies.
- ✓ Track your own funnel numbers; the example ratios are only for practice.
- ✓ If you must pay to receive, stop. Confirm every payment in your own app.
- ✓ Test any platform for 30 minutes before you trust it.

CHALLENGE 02**+150 XP****Scam Detector + Money Map**

Train your eyes to spot traps, and build the first map of your own money. You will judge three real online 'opportunities' with the red-flag checklist, then write the numbers behind one sale and one ambitious month.

Time box: 3 hours **Reward:** 150 XP

YOUR MISSION, STEP BY STEP

- ☐ Find 3 online 'opportunities' you have seen on Facebook, WhatsApp groups or TikTok, and only observe them: do not pay, reply, click unknown links or share any PIN, code or personal data.
- ☐ Score each one against the red-flag checklist, writing yes or no for every flag, then a one-line verdict.
- ☐ Write your funnel math for one 65,000 MT sale using the illustrative ratios, and mark which numbers you will replace with your real data.
- ☐ Write your funnel math for 270,000 MT per month: 3 Supplier-Ready packs (195,000 MT) plus 5 retainers (75,000 MT).

☐ List your real monthly costs (internet data, electricity, transport, phone credit) with your own amounts and add them up.

☐ Save everything as one document called 'Money Map' in your 00-Admin folder.

Proof: Your 'Money Map' document: three opportunity evaluations, the two funnel calculations and your cost list. Send it to Claude for review and save a copy in 04-Proof.

Bonus (optional, harder): Run the full 30-minute platform test on one checkout platform, including the written support question, and record every answer and screenshot.

☐ **Challenge complete.** Date: _____ XP added to the tracker

QUICK QUIZ · CHAPTER 2

1. A client sends a screenshot showing a 32,500 MT M-Pesa payment. What do you do?

- A Start the work immediately
- B Confirm in your own M-Pesa app or SMS that the money arrived
- C Ask the client for a second screenshot

2. Revenue is 65,000 MT and costs are 3,000 MT. What is the profit before tax?

- A 65,000 MT
- B 62,000 MT
- C 32,500 MT
- D 68,000 MT

3. A platform says you must pay a fee to receive your earnings. What is this?

- A A normal bank charge
- B A red flag: stop
- C A sign the platform is licensed

Answers are at the back of the book. Check yourself only after you've answered all three.

Your Market: Gas, Mining and the Companies That Need You

How big projects buy, what papers they ask for, and which local companies are your clients

IN THIS CHAPTER YOU WILL

- Explain what LNG is and name the three big gas projects.
- Describe how procurement works, from registration to contract.
- List the documents a supplier usually needs.
- Explain the Local Content Law in plain words, and which numbers are still unverified.
- Identify ideal clients using money signals and gap signals.

Now we look at the field where you will work. Big things are happening in Mozambique's gas and mining sectors. In Cabo Delgado, the Mozambique LNG project fully restarted in January 2026. On 3 June 2026, a new Mining Law and a new Local Content Law were signed. About USD 4.5 billion is committed to Mozambican companies during the construction of Mozambique LNG alone. But here is something many people miss: big buyers do not buy from companies they cannot understand. Some good Mozambican firms have trucks, workers and experience, but no English profile, no organised documents and no registration on the supplier portals. That gap is your opportunity. You do not need to be an engineer to help. You need to understand how big companies buy, what papers they ask for, and which local companies are ready to grow. This chapter gives you that map. Read it with your laptop open. At the end, you will open a real expression of interest and see the system with your own eyes.

— your mentor

3.1 Gas in plain words: LNG and the big projects

Natural gas (gás natural) is a fuel found under the ground or under the sea. To send it far by ship, companies cool it until it becomes a liquid. That is **LNG**, liquefied natural gas (gás natural liquefeito, GNL). Building the plants that do this takes years, thousands of workers and many local suppliers.

Project	Led by	Where things stand
Mozambique LNG	TotalEnergies	Full restart January 2026; first LNG targeted 2029
Rovuma LNG	ExxonMobil (Area 4)	Final investment decision expected around end of 2026
Coral North FLNG	Eni	Production targeted 2028

Some words first. The **operator** (operador) is the company that leads a project for its partners. **Onshore** means on land (em terra); **offshore** means at sea (no mar). **Force majeure** (força maior) is a legal pause because of events outside a company's control. A **final investment decision** (decisão final de investimento, FID) is the moment the owners commit the money to build. **FLNG** means floating LNG: the plant sits on a vessel at sea. **Area 4** is the name of the gas concession (área de concessão) behind Rovuma LNG and also Eni's Coral projects (Coral South and Coral North FLNG).

Key facts to remember

- **Mozambique LNG** is at Afungi, Cabo Delgado. Force majeure was lifted (decision November 2025), and onshore and offshore work fully restarted in January 2026.
- Over 4,000 workers were mobilised, with up to 7,000 Mozambicans expected at peak.
- About USD 4.5 billion is committed to Mozambican companies during construction (other sources say 'more than USD 4 billion').
- **Rovuma LNG** has lifted force majeure. ExxonMobil has reportedly earmarked about USD 4 billion for local content.
- **Eni** reports nearly USD 1 billion of contracts to Mozambican suppliers since 2016.
- **Mining:** a new Mining Law was signed on 3 June 2026, with local content requirements and a new regulator, AREMI.

TIP

When a fact is 'reported', say so when you repeat it to a client: 'ExxonMobil has reportedly earmarked...'. Precise words make you sound serious and protect your reputation.

A NOTE FROM YOUR MENTOR

Remember this clearly: you do not sell to TotalEnergies or ExxonMobil. You sell to the Mozambican companies that want to work for them: the logistics firm, the builder, the caterer. Your job is to make them ready.

— your mentor

3.2 Procurement 101: who buys and how

Procurement (aquisições) is the process a company uses to choose and buy from suppliers. In big projects, buying happens in layers called tiers (níveis). Most of your clients are SMEs (PME, pequenas e médias empresas): small and medium companies.

Tier	Who	Example
Operator	Leads the project	TotalEnergies at Mozambique LNG
Main contractor	Builds big parts for the operator	A large engineering firm
Subcontractor	Supplies the contractors	A local transport or catering SME

The usual path to becoming a supplier (details vary by buyer)

- 1 Register** on the supplier platform. On the Mozambique LNG Supplier Registration Platform, registration is free and mandatory to become a potential supplier.
- 2 Watch for EOIs.** An expression of interest (manifestação de interesse, EOI) is a public notice where a buyer asks: which companies can do this work?
- 3 Respond** with the documents and information the EOI asks for, before the deadline.
- 4 Pass prequalification** (pré-qualificação): the buyer checks if the company meets the minimum requirements.
- 5 Submit a tender** (concurso): prequalified companies are usually invited to send a priced offer.
- 6 Sign the contract:** the buyer chooses a supplier and signs.

In March 2026, Mozambique LNG held business seminars in Palma, Pemba and Maputo. They presented contracting opportunities for the next 3-9 months in categories such as construction and engineering, HSE (health, safety and environment; saúde, segurança e ambiente), emergency services, logistics and transport, office services, ICT (information and communication technology; tecnologias de informação e comunicação), general supplies,

facilities management and catering, and marine and offshore.

TIP

ExxonMobil publishes Rovuma LNG EOIs as PDFs in English and Portuguese. Read both versions side by side. It is the fastest free way to learn procurement vocabulary in two languages.

3.3 The documents, and why English matters

Documents buyers typically ask for

- **Estatutos** (Articles of Association): the founding rules and owners of the company.
- **Certidão de Registo Comercial** (Commercial Registration Certificate): Mozambique LNG EOIs ask for one under 90 days old.
- **Alvará**: the operating licence for the activity.
- **NUIT**: the company tax number.
- **Certidão de Quitação** from the tax authority and from INSS (the national social security institute): proof that taxes and social security are up to date.
- **Insurance** and **past safety performance**: the company's HSE record.

A capability statement (perfil de capacidades) presents all this in a short, professional document. In our sample, the sections are: company overview (English with a Portuguese summary), key facts, why work with us, core capabilities, equipment and resources, HSE and quality, compliance documents, selected project experience and contact.

Why English? Operators and many main contractors are international. EOIs can come in English and Portuguese, and procurement teams include foreign staff. A company with only Portuguese documents can look less ready, even when its work is excellent. A clear bilingual profile removes that doubt.

WATCH OUT

Write only what is true and proven. Never inflate a client's capabilities, HSE record, equipment or ownership. In procurement that is misrepresentation (declarações falsas), and it can damage your client and your name for years. Also check dates: a registration certificate older than 90 days may not be accepted.

3.4 The Local Content Law in plain words

Local content (conteúdo local) means the share of a project that uses national companies, workers and goods. Law No. 9/2026 of 3 June 2026 covers the oil and gas sector. In plain words, it does five things:

- It makes the participation of national companies and workers mandatory.
- It creates a Local Content Authority.
- It creates preference and exclusivity regimes: rules that favour, or reserve, some work for national companies.
- It requires supplier certification by accredited entities.
- It sets penalties.

WATCH OUT

UNVERIFIED numbers

Sources disagree on the exact thresholds. One says exclusivity needs at least 80% national inputs, at least 20% Mozambican capital and at least 50% Mozambican payroll, with a 20% price preference. An earlier bill text said 40% Mozambican capital. Do not quote any of these numbers to a client until you have read the official text in the Boletim da República yourself.

Why this matters for you: companies now need to prove they are national. That is why Supplier-Ready includes a **local-content evidence folder**: ownership, Mozambican payroll and national inputs, organised and ready. But remember your role. You prepare documents; accredited entities certify. Never claim to be certified, accredited or 'approved by' anyone.

3.5 The ecosystem: complement, never compete

- **MozUp**: enterprise development centre sponsored by Area 4 partners, with offices in Maputo and Pemba. It trains SMEs and runs a supplier portal, and says it has worked with 1,200+ suppliers since 2019.
- **CapacitaMoz**: a Mozambique LNG programme. It trained 100 SMEs in Cabo Delgado; 17 were integrated into the supply chain.
- **ACLM** (Associação de Conteúdo Local de Moçambique): hosts the Africa Gas & LNG Summit.
- **CTA's Bureau de Conteúdo Local**: launched in November 2025.
- **Clube de Petróleo + IPEME**: a cooperation to prepare SMEs.
- **Others**: local-content consultancies (SD&MP, CLC Solution, consulting.co.mz, MB Consulting) give advice, with no public prices. Web agencies in Maputo (GOLO, Create, DDB, Agência360, Lugela Digital, DOTMOZ, Mattilo and others) build sites. Our research found no

web agency based in Pemba; check again, because this can change.

These programmes offer free or subsidised help, and they **train**. You **produce finished documents**, fast, in two languages. A company trained by MozUp or CapacitaMoz can be a perfect client: it knows what it needs, but it still has to produce it. Never claim to be part of these programmes, and never use operator or MozUp logos as if they were your clients. If a director asks whether you are part of MozUp, answer like this. In English: no, I am not part of these programmes; they offer very useful training; my work is complementary, because I prepare the final documents in both languages.

SCRIPT · COPY, PERSONALISE, SEND

Não, senhor Director. Não faço parte da MozUp nem do CapacitaMoz. Esses programas oferecem formação muito útil, gratuita ou subsidiada. O meu trabalho é complementar: preparo os documentos finais, em português e inglês, prontos a usar no registo e nas respostas às manifestações de interesse.

TIP

The Africa Gas & LNG Summit takes place in Maputo, at the Joaquim Chissano International Conference Centre, on 11-13 November 2026, hosted by ACLM, with an SME session. Put it in your calendar now.

3.6 Your ideal client

Who to look for

- **Type:** Mozambican-owned SMEs with 10-200 staff.
- **Sectors:** logistics and transport, freight forwarding and customs clearing (despachantes), civil construction, equipment rental, security, catering and camp services, cleaning and facilities, HSE training, engineering and environmental consulting, IT, manpower agencies.
- **Regions:** Pemba, Palma and Montepuez (Cabo Delgado), Maputo/Matola, Beira, Nacala, Tete.
- **Decision makers:** Director-Geral, Sócio-Gerente, Administrador, Director Comercial.

Money signals (they can pay)	Gap signals (they need you)
Hiring now on emprego.co.mz	No website
Fleet or equipment	Portuguese-only or outdated site
A real office	Only a Facebook page
3+ years old; won tenders	Gmail address; no company profile

EXAMPLE**A fictional ideal client**

Imagine a fictional company called Mbali Transportes & Serviços, Lda in Pemba. It is 6 years old, has 35 staff and 10 trucks, and this month it posted two driver vacancies on emprego.co.mz. Those are money signals. It has only a Portuguese Facebook page, uses a Gmail address and has no company profile. Those are gap signals. The decision maker is the Sócio-Gerente. Logistics and transport is one of the categories Mozambique LNG presented. This company goes on your **A-list**: strong money signals plus clear gaps. A company with weaker signals goes on your **B-list**.

Where do you find companies like this? Google Maps searches such as 'transitário Pemba', 'construção civil Pemba' or 'logística Nacala'; job ads on emprego.co.mz; chamber directories such as CCPM and AMCHAM Mozambique; Facebook company pages; news about supplier workshops and EOIs; and public lists of CapacitaMoz-trained SMEs, MozUp alumni and ACLM-certified companies.

The best client is not the biggest company. It is the good company that nobody can see yet.

KEY TAKEAWAYS

- ✓ LNG is gas cooled into a liquid so ships can carry it, and three big projects are moving.
- ✓ You sell to the Mozambican companies that want to supply the operators, not to the operators.
- ✓ Registration on the Mozambique LNG supplier platform is free and mandatory for potential suppliers.
- ✓ EOIs ask for real documents, such as a commercial registration certificate under 90 days old.
- ✓ Law 9/2026 makes national participation mandatory; check its exact numbers in the Boletim da República.
- ✓ Training programmes teach; you produce finished bilingual documents.

CHALLENGE 03

+200 XP

Map the Battlefield

Stop reading about the market and look at it with your own eyes. You will open a real EOI, walk through the real supplier registration form, and build your first list of 10 ideal clients.

Time box: 1 day **Reward:** 200 XP

YOUR MISSION, STEP BY STEP

- ☐ Open the Mozambique LNG website, find one real EOI, and list every document and requirement it asks for in a new tab of your tracker.
- ☐ Register yourself on the Mozambique LNG Supplier Registration Platform (free), using only true information, and screenshot every field and screen; if a field needs company documents you do not have, screenshot it and stop there, and if anything asks you to pay, stop completely.
- ☐ Write a one-page 'field map' that lists each registration field and the document or information it needs; this becomes your guided-registration checklist.
- ☐ Use Google Maps searches and emprego.co.mz to find 10 companies that match the ideal client profile.
- ☐ Record for each company: sector, city, money signals, gap signals and the decision maker's title.
- ☐ Mark each company A-list (strong money signals plus clear gaps) or B-list.

Proof: Your EOI document list, the registration screenshots and field map saved in 04-Proof, and your tracker with 10 companies. Send a short summary to Claude for review.

Bonus (optional, harder): Open one Rovuma LNG EOI PDF from ExxonMobil in both English and Portuguese, and build a mini PT/EN glossary of 15 procurement terms you find in it.

- ☐ **Challenge complete.** Date: _____ XP added to the tracker

QUICK QUIZ · CHAPTER 3**1. What is an expression of interest (EOI)?**

- A** A signed contract
- B** A public notice where a buyer asks which companies can do certain work
- C** A tax certificate
- D** A free training programme

2. Mozambique LNG EOIs ask for a Commercial Registration Certificate that is:

- A** Under 90 days old
- B** Under 2 years old
- C** Any age, if it is stamped

3. A director asks: 'Are you part of MozUp?' You are not. What is the right answer?

- A** Say yes, to build trust
- B** Say no, and explain that you complement their training by producing finished bilingual documents
- C** Avoid the question and change the topic

Answers are at the back of the book. Check yourself only after you've answered all three.

PART 2

Build Your Business

Your offer, your proof from zero, and the tools, paperwork and payments behind it.

- 04 Your Offer: What You Sell and How to Price It
 - 05 Proof From Zero: Credibility Without Experience
 - 06 Your Toolkit: Setup, Legal and Getting Paid
- 

Your Offer: What You Sell and How to Price It

What you sell, what is inside each package, and how to say the price without fear

IN THIS CHAPTER YOU WILL

- Describe the seven parts of a strong offer.
- Explain every step of your offer ladder, with its price and contents.
- Use value-based pricing, anchors and honest scarcity without lowering your price.
- Set payment terms and a guarantee that protect both you and the client.
- Write a one-page Portal-Ready offer sheet in Portuguese, with an English summary.

Most beginners learn this too late: people do not buy your skills. They buy a result they can picture. Many talented young freelancers say 'I make websites'. Then they compete with public price lists that start at 5,000 MT. They work hard and earn little. You will not do that. In this chapter we build your offer: exactly what you sell, what is inside it, how long it takes, what it costs and what happens if the client is not happy. When your offer is clear, selling gets easier, because a director can say yes in one call. When it is vague, the director says 'mande informação' (send me information) and you never hear back. I will show you the full ladder, from a free weekly email to a 65,000 MT pack, and why each step exists. Then you will write your first offer sheet in Portuguese. By the end of this chapter you will have a page you can send to a real company tomorrow. Take your time here. Everything you sell will be built on this page.

— your mentor

4.1 The anatomy of an offer

An offer (oferta) is not a price list. It is a clear promise: for this client, with this problem, I deliver these things, by this date, at this price, under these conditions. Every strong offer has seven parts. If one is missing, the client feels unsure. Unsure people do not pay.

The seven parts

- **Problem** (problema): what hurts the client now. For example: 'Our documents are messy and only in Portuguese, so we never finish the supplier registration.'
- **Outcome** (resultado): what changes for them. For example: 'Your company profile is ready and submitted, so buyers can find you.'
- **Deliverables** (entregáveis): the exact things you hand over, such as documents, files and links.
- **Timeline** (prazo): when they receive it.
- **Price** (preço): one clear number. Avoid 'it depends'.
- **Guarantee** (garantia): what happens if they are not happy.
- **Payment terms** (condições de pagamento): how much they pay, when and how.

EXAMPLE

Weak offer vs strong offer

Imagine a fictional company called Lufo Logística in Pemba. It has 12 trucks and uses a Gmail address. A weak offer says: 'I do websites and documents. The price depends.' A strong offer says: 'In about 5 working days after I receive your documents, I prepare your bilingual capability statement (perfil de capacidades: a short PDF that shows what your company can do) and a document checklist, and I guide you through registration on the free Mozambique LNG and MozUp supplier portals. Price: 25,000 MT, 50% to start. If you do not approve the first draft, I refund the deposit.' A director can say yes to the second offer in one call. Nobody can say yes to the first.

A NOTE FROM YOUR MENTOR

I test every offer with one question: could a busy director understand it in 30 seconds, on a phone, between two meetings? If not, cut words until the answer is yes.

— your mentor

4.2 Your offer ladder, step by step

An offer ladder (escada de ofertas) is a set of offers that goes from free to expensive. At each step the client trusts you a little more before paying a little more. You will see the word EOI often. An expression of interest (manifestação de interesse, EOI) is a call from a big buyer asking companies to say they want to supply something and to show they can do it. Delivery times in the table are my suggestions, except Supplier-Ready, which is a 7-day promise. One person can deliver about 3 packs per week, so never promise more than you can do.

Your offer ladder

Offer	What is inside	Price	Delivery
Radar de Oportunidades	Weekly PT/EN summary of new EOIs	Free	Every week
Kit Fornecedor Pronto	Template, checklist, law summary	1,500 MT	Instant download
Kit + review call	Kit + 1-hour document review	5,000-7,500 MT	About 1 week (suggested)
Portal-Ready	PT/EN profile, checklist, portal registration	25,000 MT	About 5 working days (suggested)
Supplier-Ready	Portal-Ready + website, LinkedIn, signatures, evidence folder	65,000 MT	7 days
Growth Retainer	8 posts, site updates, translation	15,000 MT/month	Monthly, 3-month minimum
Automation add-on	Quote form to Sheet, email, WhatsApp	20,000 MT	Agree per client
Business English	Course for supplier staff	8,000-15,000 MT per person	About 8 weeks
Foreign track	PT versions for foreign companies	From USD 300	Agree per client

What the bigger items contain

- **Kit Fornecedor Pronto:** a PT/EN capability-statement template, a document checklist and a plain-language summary of the Local Content Law.
- **Monthly Growth Retainer** (avença mensal: a fixed monthly fee for ongoing work): 8 bilingual LinkedIn/Facebook posts, website updates and translation of tender documents up to 10 pages, every month.

- **Automation add-on:** the website quote form sends each request to a Google Sheet, triggers an email alert and opens a pre-filled WhatsApp message. Good for companies that receive many quote requests.
- **Business English for Procurement & HSE** (HSE: health, safety and environment; saúde, segurança e ambiente): 8,000-15,000 MT per person for about 8 weeks, or 40,000-90,000 MT for an in-company group of 5-8. Benchmarks I found: British Council Maputo 28,875 MT per term, Green Pole USD 60-120 per month. Check current prices before you quote them.
- **Foreign track:** Portuguese versions of company profiles, HSE documents and websites for foreign companies working in Mozambique. Paid by bank transfer, and in USDT (a cryptocurrency linked to the US dollar) only if the client asks. Keep it to about 20% of your time.

TIP

Explain the **local-content evidence folder** in simple words. It is a neat folder with proof of three things: who owns the company, its Mozambican payroll, and its national inputs (goods and services bought in Mozambique). Tell the director: 'This is the proof a buyer may ask for when they check that your company is really Mozambican.'

4.3 Why a ladder works: the trust ladder

Big companies do not send 65,000 MT to a stranger after one message. They need small proofs first. The free Radar shows that you understand their world. The 1,500 MT Kit is an easy first payment, and after it they are a client, not a stranger. The review call lets them hear how you think. Portal-Ready solves one urgent problem. Supplier-Ready changes how the whole company looks. The retainer keeps you helping every month. A client can join at any step. Some will jump straight to Supplier-Ready after one good call.

EXAMPLE

One possible path

Imagine a fictional company called Kanimambo Catering in Montepuez. The owner joins your free Radar. Two weeks later, she sees a catering opportunity in it and buys the Kit for 1,500 MT. She opens the checklist and sees that half her documents are missing or old. She books a review call. On the call, you agree on Portal-Ready. Three months later, she asks for a website. Every step was small. Every step was her choice.

A ladder is not a trick. It is a respectful way to let a stranger become a client, one step at a time.

4.4 Pricing psychology: price the result, not the hours

Value-based pricing (preço baseado no valor) means you set the price by what the result is worth to the client, not by how many hours you work. Mozambique LNG has committed about USD 4.5 billion to Mozambican companies during construction (other sources say more than USD 4 billion). Registration on its supplier platform is mandatory to become a potential supplier. Next to that, 25,000 MT (about USD 390) to be properly prepared is a small investment. But never promise that they will win. You sell readiness, not contracts.

WATCH OUT

Do not sell 'a website'

Public website price lists in Mozambique are low: Descodando lists 5,000-35,000 MT and WebSimples 9,000-25,000 MT. If you say 'website', the director compares you with those prices. Sell readiness for contracts in the gas and mining supply chain. The website is only one part of that.

Four honest pricing rules

- **Anchor** (âncora de preço): mention Supplier-Ready at 65,000 MT first. Then Portal-Ready at 25,000 MT feels reasonable. Both are real offers, so this is honest.
- **Honest scarcity** (escassez real): the prices in this chapter are launch prices for your first 3 full-price clients only (pilot discounts in Chapter 5 are separate). After that, prices rise. This is true, because one person can deliver about 3 packs per week. Never invent a fake deadline.
- **Downsell, not discount** (oferta menor, não desconto): if 65,000 MT is too much, offer Portal-Ready alone at 25,000 MT. Less work, lower price. Never do the same work for less money.
- **Never negotiate against yourself**: say the price, then stop talking. Wait. Do not add 'but I can lower it' before they have even answered.

SCRIPT · COPY, PERSONALISE, SEND

When the director says 'Está caro' (It is expensive)

Compreendo perfeitamente, Sr. Director. Então sugiro começarmos só pelo perfil da empresa e pelo registo nos portais de fornecedores, o pacote Portal-Ready, por 25.000 MT. Assim fica já com o documento principal pronto e, quando fizer sentido, avançamos para o website.

A NOTE FROM YOUR MENTOR

In English: 'I understand. Then let us start only with the company profile and portal registration, for 25,000 MT.' Notice that the price did not drop. The scope did. The first time you say 'sessenta e cinco mil meticais' to a director, your voice may shake. Practise it 20 times alone. Then say it calmly and stay quiet. Silence is not your enemy.

— your mentor

4.5 Payment terms and your guarantee

Your payment terms

- **50% deposit (sinal) to start, 50% on delivery.** No deposit, no work. Not even 'a quick draft to see'.
- **Always send a written proposal** (proposta escrita) with scope (âmbito: what is included and what is not), price, timeline, payment terms and guarantee. One page is enough. Use script H6 from your library.
- **Bank transfer for companies**, with a receipt that shows your tax number (NÚT). M-Pesa or e-Mola are fine for small deposits. Chapter 6 covers this in detail.

Your guarantee is simple: 'If you do not approve the first draft, I refund the deposit. After approval, unlimited revisions until your portal profile is submitted.' This takes the risk away from the client. It is also safe for you, because the first draft is the moment of truth. If you do good work there, refunds will be rare. Write in the proposal that revisions apply to the agreed documents only, not to new work.

WATCH OUT

Never guarantee contracts, wins or certification. You do not control what buyers decide. Under the Local Content Law (Law No. 9/2026), supplier certification is done by accredited entities, not by you. If you promise a contract and the client does not win one, you lose your reputation in a small market.

SCRIPT · COPY, PERSONALISE, SEND**Guarantee text for your proposal**

Garantia: se não aprovar o primeiro rascunho, devolvemos o sinal na totalidade. Depois da aprovação, fazemos revisões ilimitadas aos documentos acordados até o perfil da empresa ser submetido no portal. Não garantimos a adjudicação de contratos nem a obtenção de certificações.

4.6 Write your one-page offer sheet

How to build it

- 1 Write the client's problem in one sentence, in words they would use.
- 2 Write the outcome in one sentence.
- 3 List 3-5 deliverables. Use concrete nouns: PDF, checklist, registration.
- 4 Add the timeline, price, payment terms and guarantee. Choose a delivery time you are sure you can keep.
- 5 End with one clear next step, such as booking 15 minutes.
- 6 Ask Claude to draft a short English summary, then check every word yourself.
- 7 Read it aloud. Cut every sentence a busy director would skip.

SCRIPT · COPY, PERSONALISE, SEND

Worked example: Portal-Ready offer sheet

PORTAL-READY: Pronto para os Portais de Fornecedores

Para empresas moçambicanas que querem ser encontradas pelos compradores da cadeia do gás e da mineração.

O problema: os documentos da empresa estão dispersos, só em português, e o registo nos portais de fornecedores fica sempre para depois.

O resultado: em cerca de 5 dias úteis após a receção dos seus documentos, a sua empresa tem um perfil profissional em português e inglês e fica pronta para submeter o registo nos portais, com o nosso acompanhamento.

O que recebe:

- Perfil de capacidades (capability statement) bilingue PT/EN, em PDF
- Lista de verificação de documentos: Estatutos, Certidão de Registo Comercial com menos de 90 dias, NUIT, Alvará, Certidões de Quitação (AT e INSS), seguros
- Registo guiado nas plataformas gratuitas de fornecedores da Mozambique LNG e da MozUp

Preço: 25.000 MT

Pagamento: 50% para começar, 50% na entrega. Emitimos recibo com NUIT.

Garantia: se não aprovar o primeiro rascunho, devolvemos o sinal. Revisões ilimitadas até à submissão do perfil no portal.

Importante: não garantimos contratos nem certificações.

Também disponível: Supplier-Ready (Portal-Ready + website bilingue + página LinkedIn), 65.000 MT, entrega em 7 dias.

Próximo passo: responda a este email ou envie uma mensagem por WhatsApp para marcarmos 15 minutos.

EXAMPLE**English summary (for you and for foreign readers)**

Portal-Ready: in about 5 working days after we receive your documents, a bilingual capability statement, a document checklist and guided registration on the free Mozambique LNG and MozUp supplier portals. 25,000 MT, 50% to start. Deposit refunded if you do not approve the first draft. No guarantee of contracts or certification.

TIP

The line 'También disponible: Supplier-Ready... 65.000 MT' at the bottom is an honest anchor. It also shows the client how to upgrade later, without any pressure.

KEY TAKEAWAYS

- ✓ An offer is a clear promise: problem, outcome, deliverables, timeline, price, guarantee and payment terms.
- ✓ Sell readiness for contracts, not 'a website'.
- ✓ The ladder lets strangers become clients step by step, from the free Radar to the 65,000 MT Supplier-Ready pack.
- ✓ If the client says it is expensive, reduce the scope, never the price for the same work.
- ✓ No work starts without a written proposal and a 50% deposit.
- ✓ Guarantee your work, never contracts or certification.

CHALLENGE 04

+200 XP

Write your offer sheet

Create the one page you will send to real companies: a Portal-Ready offer sheet in Portuguese with an English summary. Then test it on real listeners and make it better.

Time box: 2 hours **Reward:** 200 XP

YOUR MISSION, STEP BY STEP

- ☐ Write a one-page Portal-Ready offer sheet in Portuguese that covers all seven parts of an offer.
- ☐ Add a 4-line English summary under it.
- ☐ Build a table of your whole ladder showing name, contents, price and delivery time.
- ☐ Read the offer sheet aloud to 2 people, or ask Claude to role-play the Director-Geral of a fictional logistics company in Pemba and react to it.
- ☐ Write down every question, doubt or confused face you get.
- ☐ Improve the sheet so it answers those questions, and save it as v2.

Proof: Send Claude your final offer sheet (v2), your ladder table and a list of the 3 biggest changes you made after the test reading. Also save them in a Drive folder called 'Offer'.

Bonus (optional, harder): Write a Supplier-Ready offer sheet in Portuguese as well. Then practise saying both prices out loud in Portuguese until you can say them calmly, without adding anything after the price.

- ☐ **Challenge complete.** Date: _____ XP added to the tracker

QUICK QUIZ · CHAPTER 4

1. A director says 'Está caro' about Supplier-Ready at 65,000 MT. What is the best answer?

- A** Offer Supplier-Ready for 40,000 MT
- B** Offer Portal-Ready alone at 25,000 MT
- C** Promise that the pack will win them a contract
- D** Stop replying to the director

2. Why should you not sell 'a website'?

- A** Local price lists put websites at 5,000-35,000 MT, so the director will compare you with them
- B** Websites are not allowed for suppliers
- C** Mozambican companies do not use the internet

3. Which guarantee is correct?

- A** Guaranteed contract within 3 months
- B** Certified local-content supplier after our pack
- C** Deposit refunded if you do not approve the first draft, plus unlimited revisions until portal submission
- D** No guarantee, and no refunds ever

Answers are at the back of the book. Check yourself only after you've answered all three.

Proof From Zero: Credibility Without Experience

How to earn trust honestly when you have no clients yet

IN THIS CHAPTER YOU WILL

- Deploy your demo website for free with Netlify Drop and keep it online.
- Offer pilot deals and ask for testimonials using Portuguese scripts.
- Turn a finished pilot into a short before/after case study.
- Build a consistent personal brand on LinkedIn, Gmail and WhatsApp.
- Explain what you must never fake, and why.

You have no clients, no portfolio and no business contacts. I will not pretend that is easy. A director in Pemba who is thinking about paying you 25,000 MT asks one silent question: 'Can I trust this young person?' In high-ticket sales (vendas de alto valor: selling expensive services), trust is the real currency (moeda). Money only follows it. The good news is that you can build real proof in days, not years, without telling a single lie. You already have a demo website and a sample capability statement, and you can put them online for free today. You can find two or three pilot clients who get a discount in exchange for permission to show their before and after. You can earn a free certificate in an afternoon, learn the supplier portals hands-on, and post useful content that shows you understand EOIs. In this chapter I show you each type of proof, step by step. I also show you the wall you must never cross. In a small market, one fake testimonial can end your business. Real proof grows slowly, but it never collapses.

— your mentor

5.1 Why proof matters more than talent

A client cannot see your skills before paying. The client can only see proof. Each piece of proof reduces the risk the client feels. When the risk feels small enough, the deposit arrives. Here are the types of proof you can build from zero, all of them honest.

Proof you can build as a beginner

Proof	Cost	Time	What it shows
Demo website (labelled fictional)	Free	About 1 hour	You can build a bilingual site
Sample capability statement	Free	Already built	You know what buyers ask for
Pilot case study	Discount + your time	A few weeks	A real result for a real company
Testimonial	Free	After delivery	A real client was happy
HubSpot Inbound certificate	Free	About 3 hours	You studied professional marketing
Useful posts about EOIs	Free	About 30 minutes each	You understand their world

A NOTE FROM YOUR MENTOR

Notice something in this table: almost every type of proof costs zero meticalis. It costs time, attention and honesty. You have all three.

— your mentor

5.2 Proof 1: Your demo website and sample capability statement

You already have a demo bilingual website for a fictional company, 'Exemplo Engenharia & Serviços, Lda', with a PT/EN switch and a WhatsApp quote form. You also have a matching 4-page sample capability statement, clearly labelled as a fictional sample. Together they show a director what the company will get before paying. Your first job is to put the demo online so you can send a link. You will use Netlify Drop, a free tool that puts a website folder online in a few minutes.

Deploy the demo with Netlify Drop

- 1 Unzip the demo website folder on your laptop. Open it and check that the index.html file is inside.
- 2 Open app.netlify.com/drop in your browser.
- 3 Drag the whole folder into the drop area and wait for the upload to finish.
- 4 Open the link Netlify gives you and check every page.
- 5 Create a free Netlify account and claim the site. If you skip this step, the site can expire.
- 6 Change the site name in the site settings to something clean, such as your name plus 'demo'.
- 7 Open the link on your phone. Test the PT/EN switch and check that the quote form opens WhatsApp with a pre-filled message.

WATCH OUT

Keep the 'fictional sample' label visible on the demo website and on the capability statement. Never remove it. Never replace the fictional name with a real company you have not worked for. When you send the link, call it 'um exemplo de demonstração' (a demonstration example).

TIP

Most directors will open your link on a phone, maybe with a weak signal. Test the demo on mobile data, not only on Wi-Fi. If a page is slow or broken on a phone, fix it before you show it to anyone.

5.3 Proof 2: Pilot clients

A pilot client (cliente piloto) is one of your first 2-3 clients. They get a discount in exchange for helping you build proof. For example, Portal-Ready at 12,500 MT instead of 25,000 MT. In return, they give you written permission to publish before/after examples and, if they are happy, a short testimonial (testemunho: a few sentences in their own words about your work). It is a fair trade, and both sides know the terms.

Rules for a fair pilot

- Take a maximum of 2-3 pilots. After that, charge full price.
- Give pilots the same quality and the same guarantee as full-price clients.
- Get permission in writing before you publish anything. An email or a WhatsApp message is enough.

- Respect any request to hide sensitive data, such as amounts or staff names.
- Still ask for the 50% deposit before you start: 6,250 MT on a 12,500 MT pilot.

SCRIPT · COPY, PERSONALISE, SEND**Offering a pilot by email (meaning: I am launching and looking for 3 pilot companies at half price, in exchange for permission to show the results)**

Exmo. Sr. Eng. [Apelido],

Estou a lançar um serviço de preparação de fornecedores para a cadeia do gás e da mineração e procuro 3 empresas-piloto.

A proposta: preparo o perfil de capacidades da [Empresa] em português e inglês e a lista de verificação de documentos, e acompanho o registo nas plataformas de fornecedores da Mozambique LNG e da MozUp. O preço normal é 25.000 MT; para as empresas-piloto é 12.500 MT.

Em troca, peço apenas autorização por escrito para mostrar o antes e o depois (sem dados sensíveis) e um breve testemunho, se ficar satisfeito.

Se não aprovar o primeiro rascunho, devolvo o sinal. O senhor teria 15 minutos esta semana para conversarmos?

Com os melhores cumprimentos,

[Nome]

[Telemóvel] | [Email]

SCRIPT · COPY, PERSONALISE, SEND**Asking for a testimonial (send after the client approves the final work)**

Bom dia, Sr. [Apelido]. Muito obrigado pela confiança. Como combinámos, o senhor poderia escrever 2 ou 3 frases sobre o trabalho? Por exemplo: como estava a situação antes, o que mudou e se recomendaria o serviço a outras empresas. Pode responder aqui mesmo. Pode também confirmar, por escrito, que autoriza a publicação do antes e do depois do perfil, sem dados sensíveis?

TIP

Make it easy for them: give 3 guiding questions, as in the script. Never write the testimonial yourself and ask them to sign it. Their real words, even if simple, are worth much more.

5.4 Proof 3: Turn a pilot into a case study

A case study (estudo de caso) is a short before/after story of a real job, approved by the client. It is the strongest proof a beginner can have, because it is about a real company.

From pilot to case study

- 1 Save screenshots of the 'before' when you start: the old Facebook page, the Portuguese-only profile, the Gmail address.
- 2 Write down the facts at intake: what they had and what was missing.
- 3 Save the 'after' at delivery: the new capability statement cover, the website and the portal submission confirmation, with personal data hidden.
- 4 Ask for the testimonial with the script above.
- 5 Ask Claude to draft a 150-word case study from your facts only, then check every line.
- 6 Send the draft to the client and publish only after they approve it.

EXAMPLE

A case study outline

Imagine a fictional company called Nyeleti Transportes in Nacala, with 30 staff, 12 trucks, a Facebook page and a Gmail address. Before: no company profile, no English documents, not registered on the supplier portals. What we did: a bilingual capability statement, a document checklist and guided registration. After: profile submitted on the Mozambique LNG and MozUp portals, and a PDF profile ready to attach to EOI replies. Quote: [the client's real words go here, never invented]. Notice what it does not say: 'they won a contract'. Write that only if it is true and the client allows it.

5.5 Credentials, content and your personal brand

Three more proofs that cost nothing

- **HubSpot Inbound certification:** a free online marketing course and certificate, about 3 hours. Add it to LinkedIn. Meta Blueprint courses are also free, but the exams are paid, so skip the exams for now.
- **Learn the supplier portals hands-on:** registration on the Mozambique LNG Supplier Registration Platform is free and mandatory for potential suppliers. If your own business has the real documents the platform asks for, register it honestly. If not, go through the pages as far as you honestly can, and note every field and document requested on it and on the MozUp portal. Never invent a company or documents to practise. The goal is to answer

'how does it work?' from experience, not theory.

- **Content as proof:** post short bilingual explanations on LinkedIn and Facebook, such as what an expression of interest (manifestação de interesse, EOI) is and which documents suppliers need ready. Facebook matters: it is the biggest social network in Mozambique.

SCRIPT · COPY, PERSONALISE, SEND

Example bilingual post

O que é uma EOI (manifestação de interesse)? Muitas vezes é o primeiro passo para ser considerado fornecedor de um grande projecto: a empresa mostra que tem interesse e capacidade. As EOIs da Mozambique LNG pedem documentos como: estatutos, Certidão de Registo Comercial com menos de 90 dias, alvará e historial de desempenho em segurança. Tem estes documentos prontos hoje?

What is an EOI? It is often the first step to be considered as a supplier for a big project. Mozambique LNG EOIs ask for documents such as Articles of Association, a Commercial Registration Certificate under 90 days old, an operating licence and past safety performance. Are yours ready today?

WATCH OUT

If you post about the new Local Content Law (Law No. 9/2026 of 3 June 2026), do not quote percentages or thresholds yet. Sources disagree on the numbers. Read the official text in the Boletim da República first. One wrong number in public damages the trust you are trying to build.

Set up your LinkedIn profile

- 1 Add a photo: a clear face, plain background and good light. A phone camera next to a window works.
- 2 Write the headline: 'Bilingual websites & company profiles (PT/EN) for Mozambican suppliers'.
- 3 Write the About section: 4-5 short lines in English and Portuguese saying who you help, what you deliver, how fast and how to contact you.
- 4 Add your demo website link and the sample capability statement to Featured, both labelled as examples.
- 5 Add HubSpot Inbound to Certifications when you finish it.
- 6 Add your professional Gmail and your WhatsApp Business number as contact details.

TIP

Use the same name and photo everywhere: Gmail, WhatsApp Business, LinkedIn and your email signature (script H9). If your Gmail says one name and LinkedIn says another, a director wonders whether you are two different people. Choose one name and keep it. Avoid names that sound like a big agency or an official body.

5.6 The ethics wall

The business community around gas and mining in Mozambique is small. Directors know each other. Procurement teams check. One lie travels fast, and it travels further than any good post you will ever write.

Never, under any pressure

- Fake reviews, testimonials or followers.
- Invented case studies or past clients.
- Logos of TotalEnergies, ExxonMobil, Eni, ENH or MozUp used as if they were your clients.
- Claiming that you are certified or accredited for local content, or 'approved by' anyone.
- Inflating a client's capabilities, HSE record or ownership in their documents. That is misrepresentation in procurement.
- Bribes, or paying someone for a way into vendor lists.
- Spam.
- Removing the 'fictional' label from your demo materials.

WATCH OUT

If a client asks you to write '50 trucks' when they have 20, or to claim a safety record they do not have, say no. Buyers check documents, and false information can get a company excluded. By refusing, you protect the client too.

SCRIPT · COPY, PERSONALISE, SEND

Saying no politely

Compreendo, Sr. Director, mas só posso escrever o que conseguimos comprovar com documentos. Se o comprador verificar e encontrar diferenças, a empresa pode ser excluída. Vamos antes mostrar muito bem tudo o que a empresa já tem.

Real proof grows slowly. Fake proof collapses in one phone call.

KEY TAKEAWAYS

- ✓ Trust is the currency of high-ticket sales, and proof is how you earn it.
- ✓ Put the demo online with Netlify Drop, claim it, and keep the 'fictional' label visible.
- ✓ 2-3 pilot clients at a discount, with written permission, give you your first real case studies.
- ✓ Free certificates, hands-on knowledge of the portals and useful posts all count as proof.
- ✓ Use one name and one photo everywhere.
- ✓ Never fake anything. In a small market, one lie can end your business.

CHALLENGE 05

+250 XP

Proof sprint

In two days, turn yourself from 'a young person with a laptop' into someone with visible, honest proof. Deploy your demo, finish your LinkedIn, publish useful content and send your first pilot offers.

Time box: 2 days **Reward:** 250 XP

YOUR MISSION, STEP BY STEP

- ☐ Deploy the demo website with Netlify Drop, claim it with a free account and test it on your phone using mobile data.
- ☐ Complete your LinkedIn profile: photo, headline, About and Featured with the demo link.
- ☐ Write and publish 2 bilingual posts, for example 'What is an EOI?' and 'Which documents should a supplier have ready?'.
- ☐ Choose 3 companies that match your ideal client and could become pilots.
- ☐ Send the pilot offer script by email to all 3, personalised with the decision maker's name and one real observation about their company. Use WhatsApp only after they give permission.
- ☐ Record each message in a list with the date and the planned follow-up day.

Proof: Send Claude your live demo link, your LinkedIn profile link, the links to your 2 posts and the 3 pilot messages exactly as you sent them, with phone numbers and email addresses removed.

Bonus (optional, harder): Complete the free HubSpot Inbound certification (about 3 hours) and add it to your LinkedIn profile the same day.

☐ **Challenge complete.** Date: _____ XP added to the tracker

QUICK QUIZ · CHAPTER 5

1. What must you do after dragging the demo folder into Netlify Drop?

- A Nothing, it stays online forever
- B Claim it with a free Netlify account so it does not expire
- C Pay for a hosting plan
- D Remove the 'fictional sample' label

2. What is a fair pilot deal?

- A A discount in exchange for written permission to publish before/after examples and a testimonial
- B Lower-quality work for a lower price
- C Free work with no deposit and no agreement

3. A client asks you to write '50 trucks' when they have 20. What do you do?

- A Write it, because the client is always right
- B Write it, but charge more
- C Refuse politely and present their real strengths well

Answers are at the back of the book. Check yourself only after you've answered all three.

Your Toolkit: Setup, Legal and Getting Paid

Free tools, basic formalities and safe ways to receive money

IN THIS CHAPTER YOU WILL

- Set up Gmail, Drive, Sheets, WhatsApp Business, Canva, Netlify and Google Meet for your business.
- Build a simple CRM to follow every company from first contact to retainer.
- Work with Claude safely: give facts, use prompts P1-P5 and check everything.
- Explain the basics of NUIT, receipts, ISPC and written proposals.
- Receive payments safely and keep simple records of your money.

Many beginners lose their first big client not because their work is bad, but because they look disorganised. They forget a follow-up. They send a file called 'documento final final 2.pdf'. They cannot issue a receipt when the finance team asks for one. They accept a screenshot as proof of payment and lose the money. None of that will happen to you. In this chapter we build your machine: the free tools you need, how to organise them, and how to work with me, Claude, as your co-worker. Then we cover the boring but essential part: your tax number (NUIT), receipts, the simplified tax called ISPC, and how to get paid safely by bank transfer, M-Pesa or e-Mola. I will be honest where I am not sure: some tax details are not verified, and you must confirm them with the tax authority or an accountant. A good machine makes you look like a real business from day one. It also protects every metical you earn.

— your mentor

6.1 Your free toolkit

Seven free tools

Tool	What you use it for	Cost
Gmail	Professional email	Free
Google Drive	One folder per client	Free
Google Sheets	CRM and money log	Free
WhatsApp Business	Profile, catalogue, quick replies, labels	Free
Canva	Covers, posts, simple PDFs	Free plan
Netlify	Hosting for demo and client sites	Free plan
Google Meet	15-minute calls and review calls	Free

Set up Gmail and your signature (H9)

- 1 Create a new Gmail address using the same name you use on LinkedIn and WhatsApp. After your first deposit, buy your own domain and add a professional address, so you practise what you sell.
- 2 Open Settings (the gear icon), then See all settings, then find Signature on the General tab.
- 3 Paste your H9 signature, for example: name, one line about what you do in PT/EN, WhatsApp number and demo link.
- 4 Send a test email to yourself and open it on your phone to check how it looks.
- 5 Send at most about 30 personalised cold emails (emails to people who do not know you yet) a day from the new account, in plain text, with links instead of attachments.

EXAMPLE

Drive folders and file names

Create one main folder called 'Clientes'. Inside it, make one folder per client, for example 'LufoLogistica_Pemba' for the fictional Lufo Logística. Inside each client folder: 01_Intake, 02_Drafts, 03_Final, 04_Payments. Name every file in this order:

date_client_document_version. For example:

2026-10-05_LufoLogistica_CapStatement_v2.pdf. With the date first, files sort in order.

With the version number, you never send the wrong draft.

6.2 Your CRM in Google Sheets

A CRM (gestão de relacionamento com clientes) is a list of every company you contact and where it is in your process. Without one, you will forget follow-ups, and a forgotten follow-up is a lost chance. Make one row per company and use these 8 columns.

CRM columns

Column	Example
Company	Lufo Logística (fictional)
Sector / City	Logistics / Pemba
Decision maker	Director-Geral, from public page
Contact	Public email and phone
Gap observed	Only Facebook, Gmail address
Stage	Sent
Value	25,000 MT
Next step + date	Follow-up, 2026-10-08

The 9 stages

- **Listed:** found and researched, not contacted yet.
- **Sent:** first email or message sent.
- **Replied:** they answered.
- **Call booked:** date and time agreed.
- **Call done:** you spoke and took notes.
- **Proposal:** written proposal sent.
- **Deposit:** 50% received and confirmed in your own account.
- **Delivered:** final work handed over and the second 50% received.
- **Retainer:** paying monthly.

TIP

Use Data, then Data validation to turn the Stage column into a dropdown list. Every morning, sort or filter by 'Next step date'. Everything due today is your work for the day.

6.3 WhatsApp Business

Set it up

- 1 Install WhatsApp Business on a number you will keep for years.
- 2 Fill in the profile: the same business name as everywhere else, a short description, your email, your demo link and your working hours.
- 3 Add your offers to the catalogue with prices: Kit 1,500 MT, Portal-Ready 25,000 MT, Supplier-Ready 65,000 MT, Retainer 15,000 MT/month.
- 4 Create the quick replies /pagar, /proposta and /obrigado.
- 5 Create labels: New contact, Call booked, Proposal sent, Deposit paid, Client.

SCRIPT · COPY, PERSONALISE, SEND

Your three quick replies

/pagar

Obrigado pela confiança, Sr(a). [Apelido]. Para iniciarmos, o sinal de 50% é de [valor] MT. Transferência bancária: [banco], titular [nome], NIB [número]. Por favor, envie o comprovativo; confirmo a recepção na minha conta antes de começar. Emito recibo com o meu NUIT.

/proposta

Bom dia, Sr(a). [Apelido]. Conforme conversámos, segue em PDF a proposta com o âmbito, o prazo, o preço e as condições. Fico a aguardar a sua decisão e estou disponível para qualquer dúvida.

/obrigado

Muito obrigado, Sr(a). [Apelido]. Foi um prazer trabalhar com a [Empresa]. Se precisar de mais alguma coisa, estou ao dispor.

WATCH OUT

Ask permission before you send anything to a new contact on WhatsApp. Add a maximum of 15 new contacts per hour, and never paste the same text to many people. WhatsApp has been rolling out limits on messages to non-contacts who do not reply. A 'no' is final: thank them and stop.

6.4 Working with Claude as your co-worker

I am your co-worker, not your boss and not your source of facts. You bring the facts, I draft, and you check everything before anything leaves your laptop.

How to work with me well

- 1 Give context: who the client is, what you are selling and what the document is for.
- 2 Paste only real facts: their public 'About' text, your call notes, their documents.
- 3 Choose the right prompt: P1 mini-audit and free English paragraph, P2 capability statement content, P3 adapting the demo website, P4 proposal from call notes, P5 translation with a glossary.
- 4 Ask me to write [MISSING] wherever a fact is not given, instead of guessing.
- 5 Check every number, name and claim against the client's documents before you send anything.

EXAMPLE

A mini example

You paste: 'Client: Lufo Logística (fictional), Pemba. 12 trucks, founded 2019, transports building materials. Use P2. Mark anything unknown as [MISSING].' I return a draft with lines like 'Fleet: 12 trucks. HSE certification: [MISSING]. Insurance: [MISSING].' Now you know exactly what to ask the client, and nothing has been invented.

A NOTE FROM YOUR MENTOR

I can make mistakes, and sometimes I sound sure when I should not. You are the last check, every time. Your name goes on the document, not mine.

— your mentor

6.5 Legal and tax basics

Your **NUIT** (Número Único de Identificação Tributária) is your tax number. If you have a bank account, you usually already have one. Companies often need an invoice or receipt (factura/recibo) showing the supplier's NUIT, and they usually pay by bank transfer. If you cannot provide one, the deal can stall in the finance department.

WATCH OUT**ISPC: confirm before you act**

ISPC (Imposto Simplificado para Pequenos Contribuintes) is the simplified tax for small taxpayers. Recent changes have been reported (Law 9/2025), but the rates and thresholds are UNVERIFIED in this book. Do not guess and do not copy numbers from social media. Ask the tax authority (Autoridade Tributária, AT) or an accountant before you issue your first receipt.

Your proposal is your simple written agreement

- **Scope** (âmbito): exactly what is included and what is not.
- **Price and timeline.**
- **Payment terms:** 50% deposit, 50% on delivery, and how they pay.
- **Guarantee:** deposit refund if the first draft is not approved; unlimited revisions until portal submission; no guarantee of contracts or certification.
- **Acceptance:** the client replies 'Aceito' by email. Save that email in the client folder.

SCRIPT · COPY, PERSONALISE, SEND**Three written questions for AT or an accountant**

Exmos. Senhores,

Sou trabalhador por conta própria e vou prestar serviços de elaboração de documentos empresariais e websites a empresas. O meu NUIT é [número]. Gostaria de esclarecer:

1. Posso registar-me no ISPC para esta actividade? Quais são as taxas e os limites actuais?
2. Que documentos devo emitir aos clientes empresariais (factura, recibo) e como os obtenho?
3. Quais são as minhas obrigações de declaração e de pagamento, e em que datas?

Com os melhores cumprimentos,

[Nome]

6.6 Getting paid safely and keeping your books

How to receive money

Method	Use it for	Watch out
Bank transfer	Company payments, large amounts	Issue a receipt with your NUIT
M-Pesa / e-Mola / mKesh	Deposits, small payments, Kit sales	Individual M-Pesa limit: 200,000 MT per day
USDT (crypto)	Only foreign clients who ask	Check it on a blockchain explorer

Method	Use it for	Watch out
Checkout platforms	Low-ticket digital Kit only	Run the 30-minute test first

Three words from the table. **B2B** (business-to-business, entre empresas) means selling to companies; for B2B, use bank transfer. A **blockchain explorer** is a public website where you can check that a crypto payment really arrived. A **checkout platform** is a website that collects payments for you, useful only for low-ticket (cheap) products like the 1,500 MT Kit.

WATCH OUT

Payment scams

Always confirm money in your own app or SMS. Never trust a screenshot. Watch for fake payment receipts, 'I sent money by mistake, send it back', and overpayments followed by a request for a refund. Never share your PIN or SMS codes, and never pay a 'fee to receive' money. Owning crypto is not prohibited for individuals, but the central bank warns about the risks, so accept USDT only when a foreign client asks for it.

Test any checkout platform before you trust it. EscalPay, for example, is young and has conflicting fee claims (10% per sale on one site, 8% + USD 0.50 on another). In my research I found no Banco de Moçambique licence for it and no independent reviews. It may be OK to test for a small digital product, if you withdraw after every sale, but never use it for B2B deals. A new National Payment System Law, reported as Lei 15/2026, puts payment providers under Banco de Moçambique licensing, but its text is UNVERIFIED here.

The 30-minute platform test

- 1 Open an account and take a screenshot of the fees.
- 2 Ask support in writing: the exact fee, the legal entity, which licensed entity collects the money, and how refunds work after you withdraw.
- 3 Make a 50 MT test sale with your own M-Pesa and read the merchant name in the SMS.
- 4 Check Banco de Moçambique's list of authorised payment institutions.
- 5 Compare one alternative. Claimed fees: Lojou 10% + 10 MT with 48-hour payout; FambaPay 10% + processor fees; PaySuite about 6% via M-Pesa, according to a third-party blog.
- 6 Withdraw your money after every sale if you decide to use a platform.

Simple bookkeeping

- Keep business money in a separate account from personal money.

- Keep a money log in Sheets with these columns: date, client, amount, method, reference, receipt number, notes.
- Set aside a percentage of every payment for tax (confirm the amount with AT or an accountant) and a percentage for savings.
- Pay yourself a fixed amount on a fixed day, not 'whatever is left'.
- Save every proof of payment in the client's 04_Payments folder.

KEY TAKEAWAYS

- ✓ Seven free tools are enough to look professional from day one.
- ✓ Your CRM has 8 columns and 9 stages. Check 'next step' every morning.
- ✓ With Claude, you bring the facts, Claude drafts with [MISSING] markers, and you check everything.
- ✓ Have your NUIT ready, put every deal in a written proposal and confirm ISPC with AT or an accountant.
- ✓ Use bank transfers for companies and confirm every payment in your own app, never by screenshot.
- ✓ Keep business money separate, log every payment and set money aside for tax and savings.

CHALLENGE 06**+200 XP**

Set up the machine

Build the tools that will run your business every day. By tonight you should be able to track a lead, send a proposal, receive a deposit safely and record it.

Time box: 1 day **Reward:** 200 XP

YOUR MISSION, STEP BY STEP

- ☐ Build your CRM sheet with the 8 columns, a Stage dropdown with the 9 stages and 10 real companies at 'Listed'.
- ☐ Build a money log sheet with these columns: date, client, amount, method, reference, receipt number, notes.
- ☐ Set up WhatsApp Business with a profile, a catalogue and the quick replies /pagar, /proposta and /obrigado.

- ☐ Write your own proposal template from H6 with your name, NUIT, payment details and guarantee text.
- ☐ Send AT or an accountant your 3 written questions about ISPC.
- ☐ Run the 30-minute payment test on one platform and write down what you found. The 50 MT test sale comes back to you, minus the fee.

Proof: Save screenshots of your CRM, money log and WhatsApp quick replies, your proposal template as a PDF, a copy of your message to AT and your platform test notes in a Drive folder called '00_Admin'. Then send them to Claude for review, with your NIB, NUIT and phone numbers hidden.

Bonus (optional, harder): Run a full practice flow with a fictional client called 'Exemplo': create the Drive folder with its 4 subfolders, save a correctly named file, add a CRM row, write a proposal and record a pretend deposit in the money log, clearly marked as a test.

- ☐ **Challenge complete.** Date: _____ XP added to the tracker

QUICK QUIZ · CHAPTER 6

1. Which file name follows the system?

- A** 2026-10-05_LufoLogistica_CapStatement_v2.pdf
- B** capability final FINAL.pdf
- C** documento novo (3).pdf

2. A client sends a screenshot of an M-Pesa deposit. What do you do?

- A** Start work immediately
- B** Confirm the money in your own M-Pesa app or SMS before starting
- C** Ask them to send the money again

3. Where should you get the current ISPC rates and thresholds?

- A** A popular Facebook post
- B** This book, which has confirmed them
- C** The tax authority (AT) or an accountant

Answers are at the back of the book. Check yourself only after you've answered all three.

PART 3

Win Clients

Find companies with money, write messages that get replies, and close on the call.

07 Finding Clients: A Lead List With Money

08 Outreach: Messages That Get Replies

09 Sales Calls and Closing

Finding Clients: A Lead List With Money

How to find companies that can pay, have a gap you can fill, and have a person who can say yes

IN THIS CHAPTER YOU WILL

- Explain the difference between a lead, a prospect and a client.
- Qualify a company using money signals, gap signals and a reachable decision maker.
- Score companies from 0 to 5 and sort them into an A-list and a B-list.
- Use free sources, step by step, to find companies in the gas and mining supply chain.
- Find a decision maker's name and professional contact ethically, and record it in a tracker.

*Here is something many beginners learn too late. Often the problem is not a bad offer. The problem is talking to the wrong people. Beginners send beautiful messages to a bakery that will never pay 65,000 MT, or to a company that has no reason to listen. In this chapter we fix that before you send a single message. You will learn to find companies that have money, have a visible problem you can solve, and have a real person who can say yes. I call this **a lead list with money**. The work is not exciting. You will sit with your laptop, open emprego.co.mz and Google Maps, and write names in a sheet. But one hour of good research saves you many hours of messages that nobody answers. By the end of this chapter you will have your first 25 companies, scored and sorted. Everything else in Part 3 runs on that list.*

— your mentor

7.1 Lead, prospect, client: three different things

In sales, each word tells you what to do next. A **lead** (contacto potencial) is any company that might need your service. You know its name and maybe its sector, but not much more. A **prospect** (cliente potencial qualificado) is a lead you have checked. It fits your ideal client, it shows signs of money, and you can see a gap you can fill. A **client** (cliente) is a company that has paid you, at least the 50% deposit.

The three stages

Stage	What you know	Your next action
Lead	Name, sector, maybe a phone	Research it and score it
Prospect	Money, a gap and a person	Send a value-first message
Client	Deposit confirmed in your account	Send H8, then deliver

This week, most of your time goes into turning leads into prospects. Here is the rule: **you do not message leads. You message prospects.** This one rule protects your time and your reputation.

A NOTE FROM YOUR MENTOR

When I talk about your time, I am serious. You are one person, and you can deliver about 3 packs per week. You do not need 500 contacts. You need 25 good ones to start. Then build up until you can feed 20 value-first outreaches every weekday, which means about 100 new prospects a week once you are running.

— your mentor

7.2 Qualify: money, a gap and a person who decides

Qualification (qualificação) means checking if a lead is worth your time. Ask three questions. Can this company pay? Does it have a problem I can solve? Is there a real person who can decide?

Our ideal client is a Mozambican-owned **SME** (pequena e média empresa, PME), meaning a small or medium company with 10 to 200 staff. Good sectors are: logistics and transport, freight forwarding and customs clearing (despachantes), civil construction, equipment rental, security, catering and camp services, cleaning and facilities, **HSE** training (HSE means health, safety and environment; saúde, segurança e ambiente), engineering or environmental consulting, IT, and manpower agencies.

Money signals (sinais de dinheiro)

- The company is **hiring now**, for example a job post on emprego.co.mz.
- It shows a **fleet or equipment**: trucks, machines, generators, vans.
- It has a **real office** address, not only a phone number.
- It is **3 or more years old**.
- It has **won tenders** (concursos) or posts about contracts and projects.

Gap signals (sinais de lacuna)

- **No website** at all.
- A website only in **Portuguese**, or clearly **outdated**.
- **Only a Facebook page** as its online presence.
- A **Gmail address** as the business email.
- **No company profile** (perfil da empresa) or capability statement (perfil de capacidade: a short document that shows what a company can do) to send to big clients.

The third question is the **decision maker** (decisor): the person who can say yes and approve payment. In our clients this is usually the Director-Geral, the Sócio-Gerente, the Administrador or the Director Comercial. If you cannot find a name yet, the company stays on your list, but it gets one point less.

TIP

A company with money and no gap does not need you. A company with a gap and no money cannot pay you. You need **both, plus a person**. Write this on a piece of paper next to your laptop.

7.3 Your 0-5 score and the A-list

Scoring (pontuação) stops you from guessing. Give each company one point for each 'yes' below. The maximum is 5. Our target regions are Pemba, Palma and Montepuez (Cabo Delgado), Maputo/Matola, Beira, Nacala and Tete.

The 0-5 score

Point	Question	Example of yes
+1 Sector	In our ideal sectors?	Logistics, catering, security
+1 Region	In a target region?	Office in Pemba
+1 Money	At least one money signal?	Hiring 5 drivers

Point	Question	Example of yes
+1 Gap	At least one gap signal?	Only a Facebook page
+1 Name	Name and title known?	Sócio-Gerente named online

How to sort the list

- **4-5 points: A-list.** These get a personal, value-first email (H1) and a WhatsApp permission message (H2).
- **2-3 points: B-list.** These get a short email (H3). Check them again later.
- **0-1 points: remove.**
- **Special rule:** if sector fit is 0, remove the company, whatever the score.

EXAMPLE

Worked example: scoring three fictional companies

1. Imagine Lufo Logística, a fictional transport company in Pemba. It has a job post on emprego.co.mz for truck drivers. Its Facebook page shows 12 trucks. It has no website and uses a Gmail address. The Facebook 'About' section names the Director-Geral, Eng. Mussa. Score: sector 1 + region 1 + money 1 + gap 1 + name 1 = **5. A-list.**

2. Imagine Mar Azul Catering, a fictional catering company in Maputo. It has a Portuguese-only website that looks years old. You see no hiring and no project news. You found no director's name. Score: 1 + 1 + 0 + 1 + 0 = **3. B-list.** Check it again in two weeks. If it starts hiring, it moves up.

3. Imagine Doce Lar Pastelaria, a fictional bakery in Matola. It has only a Facebook page, it has a real shop, and the owner's name is on the page. Score: 0 + 1 + 1 + 1 + 1 = 4. But sector fit is 0: a bakery is not a supplier for gas and mining projects. **Removed.** A high score does not save a wrong sector.

A short list of the right companies beats a long list of the wrong ones.

7.4 Where to find companies: every source, step by step

Source 1: emprego.co.mz (companies that are hiring)

- 1 Open emprego.co.mz in your browser.
- 2 Search jobs with words like 'motorista', 'logística', 'HSE', 'construção', 'segurança', and with city names like 'Pemba', 'Tete' or 'Nacala'.
- 3 Write down the company name for each job post. If a recruitment agency hides the client's name, skip it (unless the agency itself fits as a manpower company).
- 4 Search the company on Google and Facebook to find its website, email and phone.
- 5 Add it to your tracker with the note 'money signal: hiring' and the date of the job post.

Source 2: Google Maps search phrases (copy them exactly)

- transitário Pemba
- despachante aduaneiro Maputo
- logística Nacala
- aluguer de equipamentos Tete
- construção civil Pemba
- catering Pemba
- segurança privada Maputo
- formação HSE Maputo
- consultoria ambiental Maputo

On Google Maps, open each result. Look for a **website button**: no button is a gap signal. Look at the photos: trucks, machines and a real office are money signals. Note the phone number and opening hours. Write down only what you actually see.

Sources 3 to 8: chambers, Facebook, news and ecosystem lists

- 1 **Chamber directories:** open the websites of the Portugal-Mozambique Chamber (CCPM) and AMCHAM Mozambique. Where a member directory is public, note the companies in your sectors.
- 2 **Facebook company pages:** search the company name, open 'About' (Sobre) and note the email, WhatsApp, phone and website. Check the date of the last post: an active page means an active company.

- 3 **News and EOIs:** search Google for words like 'Mozambique LNG fornecedores', 'manifestação de interesse' and 'workshop de fornecedores Pemba'. An expression of interest (manifestação de interesse, EOI) is a public call for suppliers. Companies named in this news are active.
- 4 **Ecosystem lists:** when news or event pages publish names of CapacitaMoz-trained SMEs, MozUp alumni or ACLM-certified companies, add the ones in your sectors. They already want contracts.
- 5 **LinkedIn (optional):** search the company page, then look for people with titles like Director-Geral or Sócio-Gerente.

TIP

Companies trained by CapacitaMoz or MozUp already understand supplier registration. Do not compete with those programmes. **Complement them:** they teach what is needed, and you produce the finished bilingual documents and the online presence.

7.5 Finding the decision maker, ethically

Find the name in this order

- 1 Check the company website: pages like 'Sobre nós', 'Equipa' or 'Contactos'.
- 2 Check the Facebook page: 'About', and posts or event photos where directors appear with their names.
- 3 Check LinkedIn for the company page and people with director titles.
- 4 Check news articles about the company.
- 5 Call the reception politely during working hours if you still have nothing.
- 6 Write the name, title, source and date in your tracker.

SCRIPT · COPY, PERSONALISE, SEND

Reception call (chamada para a recepção)

Bom dia. O meu nome é [Nome]. Estou a preparar uma breve apresentação para a [Empresa] sobre documentos de fornecedor em português e inglês.

Pode dizer-me, por favor, o nome do Director-Geral ou da pessoa responsável pela área comercial?

E qual é o melhor email para lhe enviar a informação?

Muito obrigado(a) pela sua ajuda.

Se a recepção não puder dar o nome:
Compreendo perfeitamente. Posso enviar para o email geral da empresa, ao cuidado da Direcção?

In English: you say who you are and why you are calling. Then you ask for the director's name and the best professional email. If they cannot share the name, you ask to send it to the general email 'for the attention of the management' (ao cuidado da Direcção). Be kind to receptionists. They often decide if your message reaches the director.

WATCH OUT

Privacy and respect

Never buy contact lists. Never use scraping tools (programs that copy hundreds of numbers or emails from websites automatically). Never use a personal number you found in a private post or a friend's group. Use only professional contacts that the company publishes, or that the reception gives you. Never send spam. If someone says 'não', mark the company 'Do not contact' and respect it forever. Business communities in places like Pemba are small, and your reputation travels fast.

7.6 Your tracker and your weekly rhythm

Your **tracker** (folha de acompanhamento) is a simple **CRM** (customer relationship management; gestão de relação com clientes): one free Google Sheet with one row per company. It shows who you found, why they fit, and what you do next.

Tracker columns

Column	What to write
Company, sector, region	Lufo Logística, transport, Pemba
Links	Website, Facebook, Maps link
Money signal	Hiring drivers (emprego.co.mz, date)
Gap sentence	No website; email is Gmail
Decision maker	Eng. Mussa, Director-Geral (source)
Contact	Email, business WhatsApp, source
Score and list	5, A-list
Status and next date	Not contacted, send H1 Monday

Your rhythm

- 1 Research 25 companies on days 1 and 2. This is your first list.
- 2 Add 15 to 20 new companies every week after that.
- 3 Check your B-list again every Monday. New hiring or news can move a company up.
- 4 Score every company and write its gap sentence before you send any message.

A NOTE FROM YOUR MENTOR

*Write the gap as **one specific sentence**, like 'No English version of the website, and the contact email is Gmail.' A note like 'website bad' is useless. In Chapter 8, that sentence becomes the first line of your message.*

— your mentor

KEY TAKEAWAYS

- ✓ A lead is a name; a prospect is a checked lead with money, a gap and a person; a client has paid.
- ✓ Score every company from 0 to 5: sector, region, money, gap, named decision maker.
- ✓ A-list (4-5) gets personal outreach; B-list (2-3) gets a short email; a wrong sector is always removed.
- ✓ Use free, public sources: emprego.co.mz, Google Maps, chambers, Facebook, news and ecosystem lists.
- ✓ Find decision makers ethically: public pages and polite reception calls, never bought lists or scraping.
- ✓ Start with 25 companies, then add 15 to 20 per week.

CHALLENGE 07

+200 XP

Build Your First 25

Build a tracker with 25 real Mozambican companies from at least three sources, each scored from 0 to 5. Put 10 on your A-list, each with one specific gap written in one sentence. Find the decision maker's name and title for at least 5 of them.

Time box: 2 days **Reward:** 200 XP

YOUR MISSION, STEP BY STEP

- ☐ Create a free Google Sheet with the tracker columns from this chapter.
- ☐ Search emprego.co.mz, at least three Google Maps phrases from the list, and one more source (Facebook, a chamber directory or news).
- ☐ Add 25 companies and write the money signal and gap signal you actually saw for each one.
- ☐ Score every company from 0 to 5 and remove any company with sector fit 0.
- ☐ Mark your best 10 as the A-list and write one specific gap sentence for each.
- ☐ Find the decision maker's name and title for at least 5 A-list companies, using public sources or a polite reception call, and note the source.

Proof: Send Claude (or save in your 'Evidence' folder) a screenshot of your tracker showing 25 rows with scores, the 10 A-list gap sentences, and at least 5 decision-maker names with their sources.

Bonus (optional, harder): Call the reception of 3 A-list companies with the script, confirm the decision maker's name and best email, and write down exactly what each receptionist said.

- ☐ **Challenge complete.** Date: _____ XP added to the tracker

QUICK QUIZ • CHAPTER 7**1. What is the difference between a lead and a prospect?**

- A** A lead has paid you; a prospect has not.
- B** A prospect is a lead you checked: it fits, shows money and has a gap you can fill.
- C** There is no difference.
- D** A prospect is any company you found on Google Maps.

2. A fictional hair salon in Beira has no website, is hiring, and you know the owner's name.**What do you do?**

- A** A-list: the score is 4.
- B** B-list: check it again later.
- C** Remove it: a wrong sector is removed whatever the score.

3. Which is an ethical way to find a decision maker's contact?

- A** Buy a contact list from a Facebook group.
- B** Use a scraping tool to copy numbers.
- C** Ask the reception politely for the name and the best professional email.
- D** Use a personal number from a private post.

Answers are at the back of the book. Check yourself only after you've answered all three.

Outreach: Messages That Get Replies

The value-first method: give something useful, ask one small question, follow up politely

IN THIS CHAPTER YOU WILL

- Apply the five principles of a message that gets a reply.
- Write formal Portuguese business messages with the correct titles and tone.
- Run the full value-first sequence, from Prompt P1 to the day-7 message.
- Protect your email and WhatsApp number with daily limits.
- Answer every type of reply and measure your own reply rate.

*You have a list. Now comes the step that scares most beginners: writing to a stranger. I understand. You think, 'Who am I to write to a Director-Geral?' Here is my answer. You are the person who arrives with something useful in your hands. In this chapter you will not beg for attention. You will give first: a free, professional English paragraph about their company, drafted with Claude and checked by you. Then you ask one small question. This is the **value-first method**. It is respectful, and it gives a busy director a real reason to reply. I will also teach you the rules that keep your Gmail and your WhatsApp number safe, because losing your number in week one is a painful lesson. And I will show you how to answer every kind of reply, even the angry one. Be patient. Some directors answer after days. Your job is to send good messages every weekday and learn from your own numbers.*

— your mentor

8.1 Five principles of a message that gets a reply

Cold outreach (prospecção a frio) means contacting a company that does not know you yet. It works when the message is about them, not about you. Every message you send must follow these five principles. In this chapter, codes like H1 or P1 are the scripts and Claude prompts in your file scripts-high-ticket.md.

- **Relevance:** talk about their world: contracts, supplier portals, English documents. Not about your skills.
- **Personalisation** (personalização): the first line proves you looked at their company. Use a detail that nobody could copy and paste.
- **Give before you ask:** the free English paragraph comes before any request.
- **One clear ask:** one question only, for example a 15-minute call.
- **Short:** they can read it on a phone in less than a minute.

Give something useful first. Ask for something small second.

8.2 Portuguese business etiquette

Mozambican business writing is formal. A message that sounds too casual looks unprofessional, even if the offer is good. Use these forms until the client clearly uses a lighter tone with you.

How to address people

Situation	Write this	Why
Opening a letter	Exmo. Sr. / Exma. Sra.	Formal and respectful
An engineer	Exmo. Sr. Eng. Mussa	Titles matter
A 'Dr.' or 'Dra.'	Exma. Sra. Dra. [Apelido]	Use it if they use it
Inside the text	o senhor / a senhora	Not 'você' or 'tu'
Closing	Com os melhores cumprimentos	Standard formal close

When to send

- **Weekday mornings**, when directors read messages before meetings.
- **Saturday early morning** for owners of smaller companies, who often work then.

- Avoid late evenings and Sundays.

TIP

Copy the title people use themselves. If the email signature says 'Eng.', write 'Eng.'. If you do not know if the person is a man or a woman, write 'Exmo(a). Sr(a).' followed by the full name.

8.3 The sequence: what to send, and when

The value-first sequence

When	Channel	What	Who
Day 0	Claude	P1 mini-audit and free paragraph	A-list
Day 0	Email	H1 value-first email	A-list
Day 0	WhatsApp	H2 permission (no link)	A-list (business number)
Day 0	Email	H3 short email	B-list
Next morning, then day 3	Email, same thread	H4 follow-up	No reply yet
Day 7	Email, same thread	Final polite message	No reply yet

How to run P1, the mini-audit

- 1 Open the company's website or Facebook 'About' section.
- 2 Copy the public 'About' text and note the facts you saw: sector, region, fleet, years in business.
- 3 Paste it into Claude with Prompt P1.
- 4 Read the result: a free English 'About us' paragraph and 3 polite observations about gaps.
- 5 Check every fact, line by line. Delete anything you did not see in public information.
- 6 Save the final paragraph and the observations in your tracker.

WATCH OUT

Claude can make mistakes and can add nice-sounding claims. If the paragraph says 'ISO certified' or '20 years of experience' and you did not see that in public information, **delete it**. One false claim about their own company destroys trust in a second.

SCRIPT · COPY, PERSONALISE, SEND**H3 (B-list), H4 follow-ups and the day-7 message**

H3, email curto (B-list):

Assunto: Apresentação em inglês para a [Empresa]

Exmo(a). Sr(a). [Nome],

Ajudo empresas moçambicanas a preparar perfis de fornecedor e websites em português e inglês, para trabalharem com clientes do sector do gás e da mineração. Faria sentido uma conversa de 15 minutos esta semana?

Com os melhores cumprimentos,

[Nome] | [Telemóvel]

H4, no mesmo email (manhã seguinte):

Exmo. Sr. Eng. Mussa, venho apenas confirmar se o meu email chegou. O parágrafo em inglês é seu, sem compromisso. Tem 15 minutos na quinta ou na sexta-feira?

H4, dia 3 (com outras palavras):

Exmo. Sr. Eng. Mussa, volto ao meu email de [dia]. Se fizer sentido, mostro-lhe em 15 minutos como ficaria uma apresentação da Lufo Logística em inglês. Que dia lhe dá mais jeito?

Dia 7, mensagem final:

Exmo. Sr. Eng. Mussa, não quero ocupar o seu tempo, por isso esta é a minha última mensagem. Se no futuro precisar de documentos de fornecedor em inglês, terei todo o gosto em ajudar. Desejo muito sucesso à sua equipa.

8.4 A complete worked example: Lufo Logística

EXAMPLE**Step 1: the observations**

Imagine again **Lufo Logística**, the fictional transport company in Pemba from Chapter 7. Public facts you found: created in 2019 (Facebook page), 12 trucks in photos, a job post for drivers on emprego.co.mz, a Gmail contact address, no website, Facebook 'About' only in Portuguese.

Your three polite observations: **1)** without a website, a procurement team (departamento de compras) that searches the name finds only a Facebook page; **2)** there is no English description for foreign buyers; **3)** a Gmail address looks less formal than an email with the company's own domain.

EXAMPLE**Step 2: the free English paragraph (checked against public facts)**

'Lufo Logística is a road transport company based in Pemba, Cabo Delgado, Mozambique. Founded in 2019, the company operates its own fleet of trucks and is currently growing its team of professional drivers. Clients can contact the company directly for transport quotes and enquiries.'

Notice what it does **not** say: no certifications, no client names, no safety numbers, no promises about quality. Every sentence matches something you saw in public.

Subject lines to test

- Um parágrafo em inglês para a Lufo Logística (gratuito)
- Lufo Logística: apresentação em inglês para grandes clientes
- Pergunta rápida sobre fornecedores em Pemba

SCRIPT · COPY, PERSONALISE, SEND**Step 3: email H1 in Portuguese**

Assunto: Um parágrafo em inglês para a Lufo Logística (gratuito)

Exmo. Sr. Eng. Mussa,

Vi na página de Facebook da Lufo Logística que a empresa tem frota própria em Pemba, e no emprego.co.mz que está a contratar motoristas. Parabéns pelo crescimento.

Notei três pontos que podem pesar quando um cliente grande procura fornecedores: a empresa ainda não tem website, não encontrei uma apresentação em inglês, e o contacto público é um endereço Gmail.

Para ajudar, escrevi gratuitamente um parágrafo «About us» em inglês, com base na informação pública da empresa. Pode usá-lo como quiser:

[parágrafo em inglês]

Ajudo empresas moçambicanas a preparar a sua apresentação de fornecedor em português e inglês: perfil de capacidade, website e registo nos portais de fornecedores. Pode ver um exemplo de website bilingue (empresa fictícia) aqui: [link da demonstração]

Faria sentido uma conversa de 15 minutos esta semana?

Com os melhores cumprimentos,

[Nome]

[Telemóvel]

Look at the first line. It mentions their trucks and their hiring. It proves you looked. **Never start with 'O meu nome é...'** Start with them. Your name is already in the signature. Also note: the

demo website is clearly called fictional. Never present it as a real client.

SCRIPT · COPY, PERSONALISE, SEND**WhatsApp H2 (permission, no link)**

Bom dia, Sr. Eng. Mussa. O meu nome é [Nome]. Enviei hoje um email para a Lufo Logística com um parágrafo gratuito em inglês sobre a empresa. Posso enviar-lhe aqui uma breve mensagem sobre isso? Se preferir que não, compreendo perfeitamente.

8.5 Keep your email and your number safe

Deliverability (entregabilidade) means your messages reach the inbox, not the spam folder. On WhatsApp, it means your number is not blocked. These limits protect both.

- Send **about 30 personalised cold emails per day, maximum**, from a new Gmail account.
- Write in **plain text**: no images, no designed templates.
- Send **one link, no attachments** in a first email.
- On WhatsApp, **ask permission first** (H2). Send the link only after they say yes.
- Add **no more than 15 new WhatsApp contacts per hour**.
- **Never paste the same text** to many people. Change the first line every time.
- WhatsApp has been rolling out limits on messages to non-contacts who do not reply. Many unanswered messages can put your number at risk.
- **A 'no' is final.**

WATCH OUT

If you send 100 copy-paste messages on your first day, you risk having your Gmail account limited or your WhatsApp number blocked. Slow and personal is faster in the end.

A NOTE FROM YOUR MENTOR

*Once you are running, your daily target is **20 value-first outreaches every weekday**, plus follow-ups on day 3 and day 7. That is enough. Do not chase volume. Chase quality, every day, without skipping days.*

— your mentor

8.6 Answering replies and measuring results

Answer every reply the same day, ideally within a few hours. A fast, polite answer shows the director how you will work. Below are scripts for each type of reply. In English: 'yes' means offer two times; 'send information' means send it and ask about their next contract; 'not now' means ask when to return; 'no' means thank them and stop; anger means apologise and stop.

SCRIPT · COPY, PERSONALISE, SEND

«Sim» and «Mande informação»

Resposta «Sim, podemos falar»:

Muito obrigado(a), Sr. Eng. Mussa. Tem disponibilidade na quinta-feira às 9h00 ou na sexta-feira às 10h30? A conversa dura 15 minutos.

Resposta «Mande informação»:

Com todo o gosto, envio ainda hoje. Para lhe enviar o que é realmente útil: qual é o próximo contrato ou cliente que a empresa gostaria de ganhar?

SCRIPT · COPY, PERSONALISE, SEND

«Agora não» and «Não»

Resposta «Agora não»:

Compreendo perfeitamente. Posso voltar a contactar no próximo mês? Entretanto, o parágrafo em inglês é seu para usar. Se quiser, posso também enviar-lhe o Radar de Oportunidades, um resumo semanal gratuito de oportunidades para fornecedores.

Resposta «Não, obrigado»:

Obrigado(a) pela resposta, Sr. Eng. Mussa. Não voltarei a contactar. Desejo muito sucesso à sua equipa.

SCRIPT · COPY, PERSONALISE, SEND

An angry reply

Peço desculpa pelo incómodo. Já retirei o seu contacto da minha lista e não voltarei a enviar mensagens. Bom trabalho.

Measure your own reply rate

- 1 Count in your tracker, every week, how many messages you sent and how many replies you got.
- 2 Calculate: reply rate (taxa de resposta) = replies ÷ messages sent × 100. For example, 4 replies from 40 emails is 10%. That is just the maths, not a target.
- 3 Compare with your own last week, not with numbers from the internet.

- 4 Change **one variable at a time**: the subject line, or the first line, or the ask. Keep everything else the same for about 20 messages.
- 5 Keep the version that wins, then test the next variable.

TIP

Read every reply, even the 'no'. Notice the words directors use, like 'concurso', 'registro' or 'documentos'. Use their words in your next messages.

KEY TAKEAWAYS

- ✓ Value-first: give a free, checked English paragraph before you ask for anything.
- ✓ Be formal: Exmo(a). Sr(a)., titles like Eng. and Dr., 'o senhor/a senhora'.
- ✓ Follow the sequence: P1, H1 and H2 on day 0, H3 for the B-list, H4 the next morning and on day 3, a final message on day 7.
- ✓ Protect your accounts: about 30 cold emails per day, plain text, no attachments, max 15 new WhatsApp contacts per hour.
- ✓ Answer every reply the same day, and treat a 'no' as final.
- ✓ Measure your own reply rate and change one variable at a time.

CHALLENGE 08**+250 XP**

First Contact

Send your first real value-first messages to your A-list: 10 emails and 10 WhatsApp permission messages. Log every reply and learn from it. At the end, rewrite your weakest message.

Time box: 3 days **Reward:** 250 XP

YOUR MISSION, STEP BY STEP

- ☐ Run Prompt P1 for 10 A-list companies and check every fact against public information.
- ☐ Send 10 personalised H1 emails in plain text, with one link and no attachments.
- ☐ Send 10 personalised H2 WhatsApp permission messages, only to business numbers the companies publish, with no more than 15 new contacts per hour (if an A-list company has no public WhatsApp, use the next best company).
- ☐ Log every send, reply and reply type ('sim', 'mande informação', 'agora não', 'não', no reply) in your tracker.

- ☐ Answer every reply the same day using the scripts in this chapter.
- ☐ Send the H4 follow-up on the same thread to everyone who has not replied.
- ☐ Read all replies and rewrite the message that got the weakest response.

Proof: Send Claude a screenshot of your tracker with the 20 contacts, dates and reply types, your reply rate, and the old and new versions of your weakest message side by side.

Bonus (optional, harder): On your next 20 emails, test two subject lines (10 emails each), keep everything else the same, and report which one got more replies.

- ☐ **Challenge complete.** Date: _____ XP added to the tracker

QUICK QUIZ · CHAPTER 8

1. Which first line is best for a cold email?

- A** 'O meu nome é [Nome] e trabalho com websites.'
- B** 'Vi que a Lufo Logística está a contratar motoristas e tem frota própria em Pemba.'
- C** 'Promoção especial, só hoje!'

2. What is the safe way to use WhatsApp for new contacts?

- A** Send the same message to as many people as possible on day one.
- B** Ask permission first, add no more than about 15 new contacts per hour, and never send identical texts.
- C** Send the link first, then ask permission.

3. A director replies 'Não, obrigado.' What do you do?

- A** Send the day-7 message anyway.
- B** Thank them, mark 'Do not contact' and never message again.
- C** Call them to change their mind.
- D** Try again on WhatsApp.

Answers are at the back of the book. Check yourself only after you've answered all three.

Sales Calls and Closing

A calm 15-minute call, honest answers to objections, and a proposal sent within 30 minutes

IN THIS CHAPTER YOU WILL

- Book a call with two specific time options and prepare for it in 20 minutes.
- Run a 15-minute call using the four discovery questions from H5.
- Say the price calmly, ask a closing question and stay silent.
- Handle six common objections with polite Portuguese replies and clear negotiation rules.
- Send a proposal within 30 minutes, confirm the deposit safely and onboard the client with H8.

*This is the chapter where money changes hands. A director said 'yes, let's talk', and your heart beats faster. Good. That means you care. But a sales call is not a performance. It is a short, honest conversation. You ask good questions, you listen more than you talk, and then you propose one clear solution with one clear price. In this chapter I give you the full 15-minute structure, a complete sample call in Portuguese with a fictional director, and calm answers to the objections you will hear most. You will also learn three rules I want you to follow forever: **trade, do not give; downsell, do not discount; never promise that a client will win a contract**. Then you will practise with Claude playing a tough director until the words feel natural. Remember, big companies take days or weeks to decide. Your job on the call is not to force a yes. It is to make the next step easy and clear.*

— your mentor

9.1 Booking and preparing the call

When a director agrees to talk, **offer two specific times**. Do not ask 'When are you free?'. That question gives a busy person extra work. Two clear options make the decision easy.

SCRIPT · COPY, PERSONALISE, SEND

Booking message

Muito obrigado(a), Sr. Eng. Mussa. Tem disponibilidade na terça-feira às 9h00 ou na quarta-feira às 14h30? A conversa dura 15 minutos, por telefone ou WhatsApp, como preferir.

Your 20-minute preparation

- 1 Read the company's row in your tracker again, plus its website or Facebook page.
- 2 Write 3 **hypotheses** (hipóteses), meaning guesses about their needs. Example: 'They want to register on the Mozambique LNG portal', 'Their documents are only in Portuguese', 'Big clients find only a Facebook page'.
- 3 Open the demo website (the fictional Exemplo Engenharia & Serviços) and the sample capability statement, ready to send.
- 4 Keep your offer sheet open: one page with your packages and prices.
- 5 Find a quiet place, charge your phone and check your data bundle.
- 6 Prepare a notebook or a blank document for notes.

TIP

Hypotheses are guesses, not facts. The call tests them. Never tell the director 'Your problem is...'. Ask, and let them tell you.

9.2 The 15-minute call structure

Minute by minute

Minutes	What you do	Goal
0-2	Thanks, agenda, permission	A calm start
2-9	The 4 discovery questions	Understand the problem
9-11	Summarise in their words	They feel heard
11-13	One package and the price	A clear offer
13-15	Closing question, then silence	A next step

SCRIPT · COPY, PERSONALISE, SEND**The four discovery questions (H5)**

1. Que contratos ou clientes a empresa quer ganhar nos próximos 6 meses?
2. Quando um cliente grande pesquisa a [Empresa] na internet, o que encontra hoje?
3. Já perderam alguma oportunidade por não terem documentos em inglês?
4. O que mudaria para a empresa se tivesse um perfil e um website profissionais, em português e inglês, em 7 dias?

In English: 1) which contracts they want in the next 6 months; 2) what a big client finds when searching for them; 3) opportunities lost for lack of English documents; 4) what a professional bilingual profile and website in 7 days would change. These are **discovery questions** (perguntas de diagnóstico). They help the director describe the problem in their own words.

Rules during the call

- Listen more than you speak. Do not interrupt.
- Write down their exact words. You will use them in the summary and the proposal.
- Summarise: «Se percebi bem, o senhor...» ('If I understood correctly, you...').
- Propose **one** package, not your whole price list.
- Say the price once, calmly, with no apology.
- Ask the closing question (pergunta de fecho), then stay silent.

A NOTE FROM YOUR MENTOR

The silence after the price is the hardest moment for beginners. I want you to count slowly to five in your head. You are not being rude. You are giving a busy director time to think.

— your mentor

9.3 A full sample call, annotated

Here is a complete call with **Eng. Mussa**, the fictional Director-Geral of the fictional company **Lufo Logística** in Pemba. 'EU' is you. Read it aloud. Then read my notes.

SCRIPT · COPY, PERSONALISE, SEND**Part 1: opening and discovery**

EU: Bom dia, Sr. Eng. Mussa. Obrigado pelo seu tempo. Proponho 15 minutos: faço-lhe quatro perguntas sobre a empresa e, no fim, se fizer sentido, digo-lhe como posso ajudar. Pode ser?

ENG. MUSSA: Pode ser. Mas tenho pouco tempo.

EU: Claro. Que contratos ou clientes a Lufo Logística quer ganhar nos próximos 6 meses?

ENG. MUSSA: Queremos trabalhar para o projecto de gás em Afungi. Transporte de materiais.

EU: Já fizeram o registo na plataforma de fornecedores da Mozambique LNG?

ENG. MUSSA: Começámos, mas pedem muitos documentos e não temos tudo organizado. Parámos.

EU: Quando um cliente grande pesquisa a Lufo Logística na internet, o que encontra hoje?

ENG. MUSSA: Só a página do Facebook.

EU: Já perderam alguma oportunidade por não terem documentos em inglês?

ENG. MUSSA: Uma empresa estrangeira pediu um perfil em inglês. Não tínhamos. Nunca mais responderam.

EU: O que mudaria para a empresa se tivesse um perfil e um website profissionais, em português e inglês, em 7 dias?

ENG. MUSSA: Podíamos terminar o registo e enviar o perfil a quem pedir.

My notes on Part 1. You set a short agenda and asked permission, so he relaxed. You added one natural extra question about the portal, because his answer opened the door. Most importantly, **he** described the problem: a stopped registration and a lost opportunity. You did not pitch once.

SCRIPT · COPY, PERSONALISE, SEND**Part 2: summary, offer, price and close**

EU: Se percebi bem: a Lufo Logística quer ser fornecedora do projecto de gás, começou o registo mas parou porque os documentos não estão organizados, não tem perfil em inglês, e hoje um cliente grande só encontra o Facebook. Está correcto?

ENG. MUSSA: Exactamente.

EU: Então recomendo o pacote Supplier-Ready: perfil de capacidade em português e inglês, lista de documentos, registo guiado nas plataformas gratuitas da Mozambique LNG e da MozUp, website bilingue, página de empresa no LinkedIn, assinaturas de email e uma pasta de evidências de conteúdo local. Entrega em 7 dias. O investimento é de 65.000 MT: 50% para começar e 50% na entrega.

[silêncio]

ENG. MUSSA: É caro. E isto garante que ganhamos contratos?

EU: Não, Sr. Engenheiro. Ninguém pode garantir contratos, e eu nunca vou prometer isso. O que garanto é isto: se não aprovar o primeiro rascunho, devolvo o depósito. E faço revisões até o perfil ser submetido no portal.

ENG. MUSSA: Mesmo assim, 65 mil agora é muito.

EU: Compreendo. Então podemos começar pelo essencial: o pacote Portal-Ready, com o perfil de capacidade bilingue, a lista de documentos e o registo guiado nos portais gratuitos. São 25.000 MT. O website pode ficar para mais tarde.

ENG. MUSSA: Isso faz mais sentido. Mas precisamos de factura.

EU: Claro. Que documentos é que a vossa contabilidade precisa para fazer o pagamento?

ENG. MUSSA: Factura com NUIT, e pagamos por transferência.

EU: Perfeito. Incluo esses detalhes na proposta. Posso enviar-lhe a proposta hoje até às 11h00, para começarmos ainda esta semana?

ENG. MUSSA: Pode enviar.

My notes on Part 2. You summarised using his words, and he confirmed. You proposed one package and said the price once, then stayed silent. When he asked about a guarantee, you were honest: **no contract promise**, only the real guarantee. When he said 'expensive', you did not lower the price of Supplier-Ready. You offered a **smaller package** (Portal-Ready). You also said clearly that the portals are free: you charge for the preparation, not for the registration. A **factura** is an invoice, and the **NUIT** is your tax number. Before your first factura, ask the tax authority (AT) or an accountant how you must issue it. The rules for small taxpayers (ISPC) were recently changed, so do not guess.

9.4 Objections and negotiation

An **objection** (objecção) is a reason a client gives for not buying now. It is usually a question in disguise. Stay calm, agree that the concern is fair, then offer a clear way forward. In English the replies below mean: start smaller; send the proposal and book a call with the partner; ask what documents finance needs; start with the profile and improve the English site; send the information and ask about the next contract; ask when the budget opens and offer the free or cheaper options.

SCRIPT · COPY, PERSONALISE, SEND

Six objections, six calm replies

«Está caro.»

Compreendo. Podemos começar só pelo perfil, no pacote Portal-Ready, por 25.000 MT, e fazer o website mais tarde.

«Tenho de falar com o sócio.»

Faz todo o sentido. Envio-lhe hoje a proposta em PDF para mostrar ao seu sócio. Podemos marcar uma chamada de 15 minutos com os dois, na quinta-feira às 10h00?

«Precisamos de factura.»

Sem problema. Que documentos é que a vossa contabilidade precisa? Preparo tudo antes do pagamento.

«Já temos website.»

Óptimo. Então começamos pelo perfil de capacidade e melhoramos a versão em inglês do vosso site.

«Mande informação.»

Com todo o gosto, envio hoje. Para enviar o que é útil: qual é o próximo contrato que querem ganhar?

«Agora não temos orçamento.»

Compreendo. Quando é que abre o próximo orçamento? Entretanto, posso enviar-lhe o Radar de Oportunidades, que é gratuito. E, se quiserem começar sozinhos, o Kit Fornecedor Pronto custa 1.500 MT.

Negotiation rules

- **Trade, do not give.** If they want a lower price, remove something (the website) or ask for something (permission to publish a testimonial).
- **Downsell instead of discounting** (oferecer um pacote menor): Portal-Ready instead of a cheaper Supplier-Ready.
- **Never lower the price of the same package.** It teaches clients that your prices are not real.

- **Pilot clients only:** for your first 2-3 clients, a discount such as Portal-Ready at 12,500 MT, in exchange for written permission to publish before/after examples and a testimonial.
- **Real scarcity only:** say 'launch price for the first 3 clients' only because it is true. You can deliver about 3 packs per week.

WATCH OUT

Never promise contract wins, certification or approval. Never say you are certified or accredited for local content, or 'approved by' Mozambique LNG, MozUp or anyone else. Never use operator logos as if they were your clients. A false promise can cost you your name in this market.

Change the package, never the price.

9.5 After the call: proposal, follow-up, deposit, onboarding

From call to client

- 1 Paste your call notes into Claude with Prompt P4 **within 30 minutes**.
- 2 Check the one-page proposal (H6): their problem in their words, the package and what is included, delivery time, price, 50% deposit and 50% on delivery, the guarantee, and what you need from them.
- 3 Save it as a PDF and send it by email. Add a short WhatsApp note if they allowed WhatsApp.
- 4 Send the first follow-up on **day 2** and the second on **day 5**.
- 5 Confirm the deposit **in your own bank app or M-Pesa/e-Mola SMS** before you start any work.
- 6 Send H8 the same day: welcome message and intake list.

SCRIPT · COPY, PERSONALISE, SEND**Proposal follow-ups**

Dia 2:

Bom dia, Sr. Eng. Mussa. Teve oportunidade de ver a proposta? Se tiver alguma dúvida, posso esclarecer numa chamada de 5 minutos.

Dia 5:

Bom dia, Sr. Eng. Mussa. Estou a organizar a agenda das próximas duas semanas, porque consigo fazer cerca de 3 projectos por semana. Prefere começar na próxima segunda-feira, ou devo voltar a contactar no próximo mês?

WATCH OUT

Collect the deposit safely

For company clients, a **bank transfer** with a receipt showing your NUIT is the normal way. M-Pesa or e-Mola can work for smaller deposits, but an individual M-Pesa account has a daily limit of 200,000 MT. **Never trust a screenshot.** Check the money in your own app or SMS. Watch for scams: fake payment receipts, 'I sent money by mistake, send it back', and overpayment refund tricks. Never share your PIN or SMS codes.

EXAMPLE

Onboarding with H8 (fictional client)

Imagine Lufo Logística pays the 12,500 MT deposit (50% of Portal-Ready at 25,000 MT), and you see it in your own account. Now you send H8: a warm welcome, the delivery date, and the intake list (lista de recolha de informação). You ask for: Certidão de Registo Comercial, NUIT, Alvará, Certidão de Quitação (tax and INSS), insurance, the logo, photos of the fleet and team, an equipment list, past projects they are allowed to mention, and one contact person. Then the rule: **you write only what their documents prove.** Never inflate capabilities, the HSE record or ownership.

9.6 Practise with Claude: role-play a tough director

A **role-play** (simulação) is a practice call where Claude plays the director and you play yourself. It is free, safe, and you can repeat it as often as you need. Practise three types: an easy director, a sceptical one, and a price-focused one.

EXAMPLE

Prompt to paste into Claude

'Act as Eng. Mussa, Director-Geral of a fictional logistics company in Pemba. Speak only formal Mozambican Portuguese. Your style is: [easy / sceptical / price-focused]. I will call you to sell the Supplier-Ready pack (65,000 MT) or Portal-Ready (25,000 MT). Give me realistic objections and do not make it easy. When I write FIM, stop the role-play and score me from 0 to 10 with my checklist, in English, with one thing to improve.'

Self-score checklist (1 point each, total 10)

- I opened with thanks, an agenda and permission.
- I asked all 4 discovery questions.
- I listened without interrupting.
- I summarised the problem in their words.
- I proposed one package only.
- I said the price once, calmly, without apology.
- I stayed silent after the closing question.
- I handled objections without lowering the price of the same package.
- I never promised a contract win.
- I agreed a specific next step with a day and time.

TIP

Do each role-play twice. Record your voice on your phone and listen once. You will hear where you rush, where you apologise, and where you forget to stop talking.

KEY TAKEAWAYS

- ✓ Book calls with two specific times, and prepare with 3 hypotheses, the demo and your offer sheet.
- ✓ In 15 minutes: agenda, 4 discovery questions, summary in their words, one package, price, closing question, silence.
- ✓ Answer objections calmly: downsell to a smaller package, never discount the same one.
- ✓ Never promise contracts, certification or approval.
- ✓ Send the proposal within 30 minutes, follow up on day 2 and day 5.
- ✓ Start work only after the deposit is confirmed in your own account, then onboard with H8.

CHALLENGE 09

+300 XP

Close One

Practise three role-play calls with Claude until the structure feels natural. Then book and run one real call, and send a proposal within 30 minutes of hanging up.

Time box: 3 days **Reward:** 300 XP

YOUR MISSION, STEP BY STEP

- ☐ Run 3 role-play calls with Claude: an easy, a sceptical and a price-focused director.
- ☐ Score yourself on the 10-point checklist after each role-play and write one thing to improve.
- ☐ Book 1 real call with an interested A-list company by offering two specific times (if nobody has replied yet, keep sending your daily outreach and keep this step open until someone does).
- ☐ Prepare in 20 minutes: write 3 hypotheses and open the demo, the sample capability statement and your offer sheet.
- ☐ Run the call in 15 minutes using the four H5 questions, and take notes in their words.
- ☐ Send the H6 proposal (drafted with Prompt P4 and checked by you) within 30 minutes, and log the time in your tracker.

Proof: Send Claude your three role-play scores with one improvement each, your notes from the real call, and a screenshot showing the time the call ended and the time the proposal was sent.

Bonus (optional, harder): Follow up on day 2 and day 5, and if the client pays, confirm the deposit in your own app or SMS and send H8 the same day.

- ☐ **Challenge complete.** Date: _____ XP added to the tracker

QUICK QUIZ · CHAPTER 9

1. After you say the price and ask the closing question, what should you do?

- A** Explain again why the price is fair.
- B** Stay silent and let the director think.
- C** Offer a quick 20% discount.
- D** Change the subject.

2. A director says 'Está caro' about Supplier-Ready (65,000 MT). What is the best reply?

- A** Lower Supplier-Ready to 40,000 MT.
- B** Offer Portal-Ready (25,000 MT) as a smaller start.
- C** Promise they will win a contract, so it is worth it.
- D** End the call.

3. A client sends you a screenshot of an M-Pesa deposit. What do you do before starting work?

- A** Start work immediately.
- B** Confirm the money in your own M-Pesa SMS or app.
- C** Ask the client to send a second screenshot.

Answers are at the back of the book. Check yourself only after you've answered all three.

PART 4

Deliver and Grow

Deliver like a professional, become #1 in your niche, and run yourself like a company.

10 Delivering Like a Professional

11 Becoming #1 in Mozambique

12 Run Yourself Like a Company

Delivering Like a Professional

The 7-day Supplier-Ready plan, from deposit to handover

IN THIS CHAPTER YOU WILL

- Run a calm, professional onboarding in the first hour after a deposit is confirmed
- Deliver the Supplier-Ready pack in 7 days with a clear day-by-day plan
- Write a capability statement that uses only true facts and says the same thing in Portuguese and English
- Check every document and website with a quality checklist before the client sees it
- Handle revisions and extra requests politely, then close with a handover, testimonial, referral and retainer offer

In this chapter you stop being someone who only sells. You become someone who delivers. I will be honest with you: the deposit is not the finish line. It is the start of a promise. Imagine a director who has just paid you 32,500 MT. He met you two weeks ago, so he is taking a risk on you. Your job now is to make him feel it was a good decision.

In this market, people talk. A director in Pemba who gets a clean bilingual capability statement on Day 2 may tell other directors about it. A director who waits three weeks for a messy file will also tell them. Good delivery is your best marketing, and it costs nothing extra.

This chapter gives you my 7-day plan for the Supplier-Ready pack. You also get the parts of a strong capability statement, a website checklist, quality control rules, and polite Portuguese phrases that protect your time. Read it once now. Read it again on the day your first deposit lands.

— your mentor

10.1 Onboarding: the first hour after the deposit

Onboarding (integração do cliente) means the first steps after a client says yes and pays. It sets the tone for the whole project. A client who feels organised on Day 0 trusts you on Day 7. We will use a fictional client in this chapter. We continue with the fictional **Lufo Logística, Lda in Pemba** and its Director-Geral, Eng. Mussa. In Chapter 9 he chose Portal-Ready; here, imagine he accepted the full Supplier-Ready pack instead. The Supplier-Ready pack costs 65,000 MT, so the 50% **deposit (sinal)** is 32,500 MT.

Your onboarding routine

- 1 Confirm the deposit in your own M-Pesa or e-Mola app, SMS or bank app. Never start because of a screenshot.
- 2 Send the welcome message and the H8 intake list from your script library.
- 3 Create a WhatsApp group with three people only: you, the decision maker, and the person who holds the company documents.
- 4 Send the 7-day timeline in writing and ask the client to reply 'OK'.
- 5 Book two meetings now: the Day 1 draft approval and the Day 7 final review.
- 6 Create the client folder in Google Drive as in Chapter 6 (01_Intake, 02_Drafts, 03_Final, 04_Payments). Share it only with the client, keep payroll, ownership and ID documents private, never forward them, and delete copies you no longer need after handover.

SCRIPT · COPY, PERSONALISE, SEND

Timeline message (send on Day 0)

Exmo. Sr. Eng. Mussa, confirmo a recepção do sinal de 32.500 MT. Muito obrigado pela confiança. Segue o plano: Dia 0 (hoje) – recolha de informação e documentos; Dia 1 – primeira versão do perfil da empresa (capability statement) para aprovação; Dia 2 – versão final em PDF e ficheiro editável, lista de documentos, pasta de evidências de conteúdo local e registo guiado (por partilha de ecrã) nas plataformas da Mozambique LNG e da MozUp; Dias 3 e 4 – website bilingue; Dia 5 – publicação do website na conta da vossa empresa e ligação ao domínio; Dia 6 – página da empresa no LinkedIn e assinaturas de email; Dia 7 – reunião final de revisão e entrega. O prazo conta a partir da recepção dos documentos da lista em anexo. Pode confirmar com um OK, por favor?

TIP

The sentence 'O prazo conta a partir da recepção dos documentos' means 'the deadline starts when the documents arrive'. It protects you. If the client sends the documents three days late, your 7 days start three days late. You agreed this in writing, so nobody is upset.

10.2 The 7-day plan, day by day

Supplier-Ready delivery plan

Day	You do	Tool	Client does
0	Collect documents, photos, facts	H8 intake list	Sends files
1	Capability statement draft 1	Prompt P2 + sample	Approves draft
2	Corrections, final PDF + editable file	Claude + free design tool	Gives final OK
3-4	Adapt the demo website	Prompt P3	Reviews preview link
5	Deploy and connect domain	Client's own Netlify	Creates account
6	LinkedIn page + email signatures	H9 signature	Creates page with you
7	Review call, handover	Final checklist	Pays balance

A NOTE FROM YOUR MENTOR

Day 1 is the most important day of the week. Your guarantee says: if the client does not approve the first draft, the deposit is refunded. So the first draft is not a rough sketch. It is your best work. I would rather you send it at 18:00 and feel proud than send it at 10:00 and feel nervous. Ask the client to write their approval in the WhatsApp group.

— your mentor

On Days 3 and 4 you adapt the demo website you already have (the fictional 'Exemplo Engenharia & Serviços, Lda'). Paste the client's approved capability statement into Claude with Prompt P3. Ask for new text, services, photos and contact details. The structure stays the same. The content changes completely.

On Day 6 the client creates the LinkedIn company page from their own personal LinkedIn profile, while you guide them on a call. The page must belong to someone inside the company, not to you. Then you prepare the email signatures with your H9 template.

WATCH OUT

Delete every trace of the demo before the client sees the site: the name 'Exemplo Engenharia', fictional phone numbers, fictional projects and sample photos. A client who finds another company's name on their website loses trust in one second.

10.3 Anatomy of a great capability statement

A **capability statement (apresentação de capacidades / perfil da empresa)** is a short document, 4 pages in our sample, that tells a buyer who the company is and what it can really do. The people who read it work in **procurement (compras / aprovisionamento)**: the team that chooses and buys from suppliers. They read many profiles. They look for facts, documents and proof, not adjectives. You will also see **HSE (Health, Safety and Environment; Saúde, Segurança e Ambiente)**, which big buyers check very carefully.

Section by section

Section	Write	Avoid
Company overview (EN + PT)	Who, where, since when, what	'Líder de mercado' slogans
Key facts	Year, staff, regions, NUIT	Numbers you cannot prove
Why work with us	3-4 real reasons	Copied text
Core capabilities	Services in plain words	A list of everything
Equipment & resources	Real items, real counts	Equipment rented once
HSE & quality	Real policies and training	'Zero incidents' without records
Compliance documents	Certidão, NUIT, Alvará, Quitação, insurance	Expired documents
Project experience	Real projects, with permission	Big names without permission
Contact	Named person, phone, email	An anonymous Gmail only

EXAMPLE

Weak vs good 'About us' (fictional company)

Weak: 'Lufo Logística is a leading company with great experience, offering the best quality services to all clients in Mozambique.'

Good: 'Lufo Logística, Lda is a Mozambican-owned transport company based in Pemba, Cabo Delgado, founded in 2019. We move general cargo and construction materials between Pemba, Montepuez and Palma with a fleet of 12 trucks. Our team of [MISSING: number of staff] is fully Mozambican. We hold a valid Alvará and Commercial Registration Certificate, and we share our HSE procedures on request.'

The good version is specific, checkable and calm. Every fact can be proven with a document. The [MISSING] marker shows a fact we still need from the client.

Four rules that never change

- **Facts only.** If the client did not give it to you in writing or in a document, it does not go in.
- **Use [MISSING] markers.** When a fact is missing, write [MISSING: what you need] and ask. Never guess. Before the final version, search the file for 'MISSING' until there are zero results.
- **Real photos.** Use the client's own trucks, team and office. No stock photos of gas platforms that pretend to be their work.
- **Bilingual consistency.** The Portuguese and English versions must show the same numbers, names and dates.

WATCH OUT

Never inflate a client's capabilities, HSE record or ownership, even if the client asks. In procurement this is **misrepresentation (declaração falsa)**. It can damage the client's reputation with the operator, and your name with it. Never put operator logos (TotalEnergies, ExxonMobil, Eni, ENH, MozUp) on a document as if they were clients.

10.4 Website checks and portal support

Website quality checklist

- Opens well on a phone screen (test on your own phone, not only the laptop)
- The PT/EN language switch works on every page
- The WhatsApp button opens a chat with the correct company number
- The capability statement PDF downloads correctly
- Spelling is checked slowly in both languages
- Phone, email and address match the capability statement exactly
- Loads fast on mobile data, not only on Wi-Fi
- No demo text, demo photos or fictional names are left

On Day 5, the website goes on the **client's own free Netlify account**. On a screen-share call, the client creates the account with the company email and logs in. You send them the finished website folder. While logged in, they drag it to `app.netlify.com/drop`, so the site lands in their account. If they already have a domain, guide them step by step to connect it. Now the client owns the website from the first day. If you disappear tomorrow, their website stays alive. That is professional.

WATCH OUT

Portal registration: the safety rule

When you help a client register on the Mozambique LNG Supplier Registration Platform or the MozUp supplier portal (both free), do it on a screen-share call. The client types their own passwords. **Never ask for passwords, never store them, and never submit anything without the client's approval.** If anything goes wrong in a portal, it must be clear that the client was in control.

TIP

Mozambique LNG expressions of interest ask for documents such as a Commercial Registration Certificate (Certidão de Registo Comercial) under 90 days old. On Day 0, check the date on the client's Certidão. If it is older than 90 days, tell them immediately, so they can request a new one while you work.

10.5 Quality control and daily communication

Quality control before anything leaves your laptop

- 1 Read every name, number and date twice: once on screen, once out loud.
- 2 Compare each fact with the original document (NUIT, Alvará, Certidão dates).
- 3 Check that Portuguese and English use the same terms from your glossary.
- 4 Search for 'MISSING' and 'Exemplo': both must return zero results.
- 5 Read it again the next morning if you can: fresh eyes find new mistakes.
- 6 Ask the client to confirm the key facts in writing in the WhatsApp group.

Start a PT/EN glossary for each client

Português	English
Certidão de Registo Comercial	Commercial Registration Certificate
Alvará	Operating licence

Português	English
Certidão de Quitação	Clearance certificate (tax or INSS)
Sócio-Gerente	Managing Partner
Saúde, Segurança e Ambiente	Health, Safety and Environment (HSE)

SCRIPT · COPY, PERSONALISE, SEND**Daily update (short, every evening)**

Boa tarde, Eng. Mussa. Ponto de situação do Dia 3: o website já tem a página inicial e a página de serviços em português e inglês. Amanhã envio o link de pré-visualização. Hoje não preciso de nada da vossa parte. Obrigado.

Learn the difference between two kinds of requests. A **revision (revisão)** is a change inside the agreed work: fix a sentence, change a photo, correct a number. Your guarantee gives unlimited revisions until the client's portal profile is submitted, so say yes happily.

Scope creep (aumento do âmbito) is new work that was never agreed, like a second company profile or a brochure. Say yes to the person, but offer it as separate work with its own price.

SCRIPT · COPY, PERSONALISE, SEND**Polite answer to scope creep**

Obrigado pelo pedido, Eng. Mussa. Terei todo o gosto em ajudar também nisso. O segundo perfil (para a empresa de construção do grupo) não faz parte do pacote Supplier-Ready que acordámos. Para não atrasar o vosso projecto, proponho terminarmos primeiro a entrega actual. Amanhã envio-lhe uma pequena proposta separada para o segundo perfil. Parece-lhe bem?

10.6 Handover and after-care

Day 7: close like a professional

- 1 Run the final review call and go through each deliverable on screen.
- 2 Collect the balance (32,500 MT) and confirm it in your own bank or mobile money app.
- 3 Send the handover pack: final PDF, editable file, website link, glossary, and a list of the accounts the client owns.
- 4 Confirm in writing that you keep no passwords.

- 5 Ask for a testimonial in the client's own words, and written permission to show a before/after example.
- 6 Ask for one referral and offer the Monthly Growth Retainer (15,000 MT/month, 3-month minimum).

SCRIPT · COPY, PERSONALISE, SEND**Testimonial and referral request**

Eng. Mussa, foi um prazer trabalhar com a vossa equipa. Tenho dois pequenos pedidos. Primeiro: poderia escrever duas ou três frases sobre a sua experiência? Com a sua autorização por escrito, gostaria de as publicar. Segundo: conhece outro director que também precise de preparar a empresa para os portais de fornecedores? Uma apresentação por WhatsApp ajudava-me muito. Por fim, para manter o LinkedIn e o website activos, tenho um serviço de acompanhamento mensal: 15.000 MT por mês, com um mínimo de três meses. Posso enviar-lhe os detalhes?

A NOTE FROM YOUR MENTOR

After-care is cheap and powerful. Put two reminders in your calendar: Day 14 and Day 30 after handover. Send one friendly line: 'Bom dia, Eng. Mussa. Já conseguiu submeter o perfil no portal? Precisa de alguma ajuda?' (Have you managed to submit the profile on the portal? Do you need any help?) Never promise contracts. Just show that you still care.

— your mentor

The sale pays you once. The delivery makes you known.

KEY TAKEAWAYS

- ✓ Start work only when the deposit is confirmed in your own app, never from a screenshot.
- ✓ Put the 7-day timeline in writing, and make the clock start when the documents arrive.
- ✓ Day 1 is the guarantee checkpoint: send your best work, not a rough draft.
- ✓ Facts only, [MISSING] markers, real photos, the same facts in both languages.
- ✓ The client owns every account and types every password; you guide, they submit.
- ✓ Revisions are free and welcome; new work gets a polite, separate proposal.

CHALLENGE 10

+250 XP

Ship It

Produce one complete, professional capability statement in 48 hours. Use a pilot client if you have one. If not, make it for your own freelance business, using only true facts about you.

Time box: 48 hours **Reward:** 250 XP

YOUR MISSION, STEP BY STEP

- ☐ Choose your subject: a pilot client (with their written OK) or your own freelance business.
- ☐ Collect every fact in one document, and mark each gap as [MISSING: ...].
- ☐ Run Prompt P2 with the 4-page sample as your template, and produce both the English and Portuguese versions.
- ☐ Design it in a free tool and export a PDF plus an editable file.
- ☐ Run the full quality control checklist from this chapter, line by line.
- ☐ Ask one person you trust to read it and find at least one mistake.
- ☐ Fix everything, then search for 'MISSING' and 'Exemplo' until both return zero results.

Proof: Send me (Claude) the final PDF, your completed checklist with a tick next to each item, and one sentence about the hardest part. Save all three in a folder called 'Proof - Ship It'. If it is a client's document, share it only with their permission.

Bonus (optional, harder): Turn the capability statement into a one-page bilingual website with Prompt P3, deploy it free with Netlify Drop, and run the website quality checklist on your own phone using mobile data.

- ☐ **Challenge complete.** Date: _____ XP added to the tracker

QUICK QUIZ · CHAPTER 10**1. The client sends you a WhatsApp screenshot of the deposit. What do you do?**

- A** Start work immediately, because the screenshot proves it
- B** Check your own app, SMS or bank statement, and start only when the money is there
- C** Ask the client to send the screenshot again in better quality

2. You are helping the client register on the Mozambique LNG portal. What is the correct way to handle passwords?

- A** Ask for the password so you can finish faster
- B** Save the password in your notes in case they forget it
- C** The client types their own password on a screen-share; you never ask for it or store it
- D** Create the account with your own email for them

3. On Day 4, the client asks for a second company profile for another business in their group. What is this?

- A** A revision, so you do it for free
- B** Scope creep, so you finish the current work and offer a separate proposal
- C** A reason to refund the deposit

Answers are at the back of the book. Check yourself only after you've answered all three.

Becoming #1 in Mozambique

Own one niche, build authority, and let the market come to you

IN THIS CHAPTER YOU WILL

- Explain your niche in one sentence in Portuguese and English
- Map competitors and free programmes, and describe the gap you fill
- Run an authority engine of bilingual posts and a free weekly Radar de Oportunidades
- Pitch partnerships to local-content organisations and consultancies, with any referral fee disclosed
- Plan your presence at the Africa Gas & LNG Summit and prepare for the next waves of opportunities

When I say 'become number one in Mozambique', I do not mean the biggest agency with fifty staff. I mean something more useful. When a director in Pemba or Maputo thinks, 'My company needs to be ready for the gas and mining supply chain', I want your name to be the first one they remember.

This is possible for a 24-year-old with a laptop, because the niche is new and narrow. Mozambique LNG fully restarted work in January 2026. The Local Content Law (Lei de Conteúdo Local, Law No. 9/2026) and the new Mining Law were both signed on 3 June 2026. Rovuma LNG aims for a final investment decision around the end of 2026. Many companies need to be ready and to show it. In our research, we did not find anyone who clearly sells finished bilingual documents for this exact purpose.

In this chapter I show you how to own that niche: your positioning, your competitor map, your authority engine, partners, events and products that scale. I also show you the ethics wall you never climb, even when you are hungry.

— your mentor

11.1 Own one niche: a category of one

Positioning (posicionamento) is the place you hold in a client's mind. Most beginners say 'I do websites, design, social media, translation, everything'. That makes them one of hundreds. A **category of one (categoria única)** means you describe your work so narrowly that you become the obvious choice, and comparison becomes difficult.

O estúdio de prontidão de fornecedores para a cadeia do gás e da mineração de Moçambique.

In English: 'The supplier-readiness studio for Mozambique's gas and mining supply chain.' This line tells the client three things: who it is for (suppliers), why it matters (contracts in gas and mining), and what you sell (readiness, not a website).

EXAMPLE

Two ways to introduce yourself

Weak: 'Olá, sou web designer e faço websites, logótipos e posts.' (Hello, I am a web designer and I do websites, logos and posts.)

Strong: 'Preparo empresas moçambicanas para fornecer ao sector do gás e da mineração: perfil de capacidades bilingue, documentos e presença digital em 7 dias.' (I prepare Mozambican companies to supply the gas and mining sector: bilingual capability profile, documents and digital presence in 7 days.)

Imagine a fictional company called Nkomo Construções in Montepuez. Its director hears the strong version and thinks: 'That is exactly my problem.'

A NOTE FROM YOUR MENTOR

Narrow feels scary. You will think, 'What if I lose the clients who just want a website?' Some will go. That is fine. The ones who stay are buying a 25,000-65,000 MT result, not a 5,000 MT page, and they remember you.

— your mentor

11.2 The competitor map and your gap

Who else is in the market

Player	What they offer	Price	Your angle
Web agencies	Websites, branding	Public lists 5,000-35,000 MT	You sell readiness, not pages
Local-content consultancies	Advice	Not public	You produce the documents
Free programmes (MozUp, CapacitaMoz)	Training, supplier portal	Free or subsidised	You complement them

The public website price lists we found are low: Descodando lists 5,000-35,000 MT and WebSimples 9,000-25,000 MT. Agencies in Maputo include GOLO, Create, DDB, Agência360, Lugela Digital, DOTMOZ, Mattilo and others. We found no known web agency in Pemba.

Consultancies such as SD&MP, CLC Solution, consulting.co.mz and MB Consulting give local-content advice. Their prices are not public, and they do not visibly produce designed bilingual documents. MozUp and CapacitaMoz train small and medium-sized companies (pequenas e médias empresas, PME, or SMEs in English).

Your gap in four points

- **Finished, not advice:** the client gets files, not homework.
- **Bilingual by default:** Portuguese and English, consistent.
- **Fast:** 7 days for Supplier-Ready.
- **Beyond Maputo:** we found no web agency in Pemba, so you can serve Cabo Delgado clients by WhatsApp and video calls. Only say you are physically there if it is true.

WATCH OUT

Never attack competitors, in public or in private. Free programmes like MozUp are not your enemy. They train companies, and those companies then need finished documents. Send clients to them. Respect builds your name faster than criticism.

11.3 The authority engine: posts, Radar and law explainers

Authority (autoridade) means people trust your knowledge before they meet you. You build it by teaching in public, regularly. Your main topic is the **expression of interest (manifestação de interesse, EOI)**: a public call where a big buyer asks suppliers to show they are interested

and qualified. Your engine has three parts: posts, the Radar and law explainers.

Three bilingual posts per week

- 1 On Monday, explain one new EOI: the category, who can apply, and which documents it asks for.
- 2 On Wednesday, explain one document, for example 'What is a Certidão de Quitação and why do buyers ask for it?'
- 3 On Friday, share one practical tip, or a before/after example from a client who gave written permission.
- 4 Post on LinkedIn and on Facebook (Facebook is the biggest network in Mozambique, with about 5 million users in April 2026).
- 5 Write in Portuguese first, then English below. Use short paragraphs and one clear message per post.

EXAMPLE

A Monday post (the EOI here is fictional)

'Nova manifestação de interesse (EOI) na área de logística. O que precisa de ter pronto: Estatutos da empresa; Certidão de Registo Comercial com menos de 90 dias; Alvará válido; histórico de desempenho em segurança. Link oficial: [link]. Tem dúvidas? Envie-me mensagem.'

Below it, write the same in English. These are the kinds of documents Mozambique LNG EOIs ask for. Always link to the official source. Never copy a PDF as if it were yours, and never add details that are not in the EOI.

The **Radar de Oportunidades** is your free weekly summary of new supplier opportunities and EOIs, in Portuguese and English, sent by WhatsApp channel or email. Sources: public EOIs from Mozambique LNG, ExxonMobil's Rovuma LNG EOIs (published as PDFs in English and Portuguese), and news about supplier workshops. Keep it free while you grow readers and trust. Later, when companies tell you it helps them, a paid version can cost 1,500-3,000 MT per month per company.

WATCH OUT

Law 9/2026: check before you quote

Sources disagree on the Local Content Law thresholds (Mozambican capital, payroll, national inputs and price preference). Read the official Boletim da República text yourself before you write any number. Always add: 'Resumo em linguagem simples, não é aconselhamento jurídico.' (Plain-language summary, not legal advice.)

11.4 Partnerships: 'You advise, I produce the documents'

A **partnership (parceria)** lets other organisations send you clients. Good partners include CTA's Bureau de Conteúdo Local (launched November 2025), ACLM (Associação de Conteúdo Local de Moçambique), the Clube de Petróleo and IPEME cooperation that prepares SMEs, and the consultancies SD&MP, CLC Solution, consulting.co.mz and MB Consulting. Your message is simple: they advise, you produce the documents.

With consultancies, you can offer a **referral fee (comissão de referência)**: a percentage you pay a partner when a client they send you pays. The rule is disclosure: the client must know about it. A disclosed fee is honest business. A hidden fee, or any payment to get a company onto a vendor list, is not.

SCRIPT · COPY, PERSONALISE, SEND

Partnership pitch to a consultancy (email)

Exmo. Sr. Dr. [Apelido], li [algo concreto sobre o vosso trabalho] e, como responsável por um pequeno estúdio de prontidão de fornecedores para a cadeia do gás e da mineração, percebi que a vossa equipa aconselha empresas moçambicanas sobre conteúdo local. Muitas dessas empresas, depois do aconselhamento, ainda precisam dos documentos finais: perfil de capacidades bilingue, lista de documentos e presença digital. É exactamente isso que eu produzo, em 7 dias. Proponho uma parceria simples: a vossa equipa aconselha, eu produzo os documentos. Para cada cliente indicado que avance, ofereço uma comissão de referência, sempre comunicada ao cliente. Teria 20 minutos esta semana para uma conversa? Com os melhores cumprimentos, [Nome], [Telemóvel]

TIP

Attach nothing to the first email. Add one link to your sample capability statement (clearly labelled as a fictional sample). Personalise the first sentence with something real you read about their work.

TIP

Associations are different

Do not offer a commission to associations or public bodies such as CTA's Bureau, ACLM or IPEME. Offer something useful instead: your free Radar for their members, or a free short talk on how to prepare a bilingual capability statement.

11.5 Events and the waves ahead

The **Africa Gas & LNG Summit** takes place in Maputo, at the Joaquim Chissano International Conference Centre, on 11-13 November 2026. ACLM hosts it, and there is a session for SMEs. Your future clients and partners will be in one building. Check the official event website for registration options and prices. Write to the organisers and ask if they need volunteers. If they do, volunteering can be a way in when you have no budget.

What to bring

- Your sample capability statement on your phone, and a few printed copies if you can (labelled as a fictional sample)
- A QR code to your website or LinkedIn
- A notebook to write names and promises
- A charged phone and a power bank
- A simple offer: a free 5-minute review of anyone's company profile

SCRIPT · COPY, PERSONALISE, SEND

Your 30-second introduction (Portuguese)

Muito prazer. Chamo-me [Nome]. Ajudo empresas moçambicanas a ficarem prontas para fornecer ao sector do gás e da mineração. Faço o perfil de capacidades em português e inglês, a lista de documentos e a presença digital, em 7 dias. Se quiser, posso ver agora o perfil da vossa empresa e dar-lhe duas sugestões rápidas.

EXAMPLE

The same in English

'Nice to meet you. I'm [Name]. I help Mozambican companies get ready to supply the gas and mining sector. I produce the capability statement in Portuguese and English, the document checklist and the digital presence, in 7 days. If you like, I can look at your company profile now and give you two quick suggestions.'

The next waves to prepare for

- **MMEC** (Mozambique Mining & Energy Conference): listed for 12-13 May 2027 in Maputo by a third-party website. Check the date on the official source.
- **MEIS Pemba 2027**: date to be confirmed.
- **Rovuma LNG FID**: ExxonMobil targets a final investment decision (decisão final de investimento, FID) around the end of 2026. After it, more EOIs are likely. Prepare post templates and Radar sections now.

- **New Mining Law** (signed 3 June 2026, with local content rules and a new regulator, AREMI): mining suppliers will need readiness too.

11.6 Products that scale, incubators and the ethics wall

Ways to earn without adding many hours

- **Kit Fornecedor Pronto (1,500 MT):** a PT/EN capability-statement template, a document checklist and a plain-language summary of the Local Content Law. Sell it on a **checkout (página de pagamento)** you have tested with the 30-minute test from the EscalePay chapter. Withdraw after every sale.
- **Affiliates (afiliados):** people who sell your kit for a commission. Pay 20-30% on the kit only, never on high-ticket packs.
- **Business English for Procurement & HSE:** 8,000-15,000 MT per person for about 8 weeks, or 40,000-90,000 MT for an in-company group of 5-8. For comparison, British Council Maputo charges 28,875 MT per term.
- **Referrals and retainers:** every happy client can open the door to the next one, and the 15,000 MT/month retainer makes income steadier.

Incubators (incubadoras) give young founders training, mentors and contacts. Look at Orange Corners Maputo (with Standard Bank, 6-month cycles for young entrepreneurs), the Standard Bank incubator, Ideialab and INCM ThinkLab. A free credential like the HubSpot Inbound certification (about 3 hours) also adds trust to your profile.

WATCH OUT

The ethics wall: at all costs, but never these

No fake reviews, testimonials or followers. No invented case studies or past clients. No operator logos used as if they were your clients. Never claim to be certified, accredited or 'approved by' anyone for local content. Never inflate a client's capabilities, HSE record or ownership. No bribes, and no paying for a way into vendor lists. No spam. Demo materials always stay labelled as fictional. Being number one means nothing if people cannot trust your name.

A NOTE FROM YOUR MENTOR

In a small market, your reputation travels faster than your posts. One lie can end years of work. One honest 'I cannot do that' can earn you a client for life.

— your mentor

KEY TAKEAWAYS

- ✓ Own one narrow niche: supplier readiness for gas and mining, not 'websites'.
- ✓ Agencies sell pages, consultancies advise, programmes train: you produce finished bilingual documents, fast.
- ✓ Teach in public: 3 bilingual posts a week and a free weekly Radar de Oportunidades.
- ✓ Partners advise, you produce; any referral fee is always disclosed to the client.
- ✓ Prepare now for the Summit in November 2026 and the Rovuma LNG FID wave.
- ✓ The ethics wall protects the only asset you cannot rebuild: your name.

CHALLENGE 11**+300 XP**

Claim Your Crown

Put your flag in the ground this week. Publish your positioning in public, launch the first issue of your Radar, open two partnership doors, and make a real plan for the Africa Gas & LNG Summit.

Time box: 5 days **Reward:** 300 XP

YOUR MISSION, STEP BY STEP

- ☐ Write your positioning statement in Portuguese and English, and publish it as a LinkedIn post and in your LinkedIn headline.
- ☐ Build Radar de Oportunidades issue #1 with 3-5 real opportunities or news items, each with a link to the official source.
- ☐ Publish issue #1 on a WhatsApp channel or LinkedIn, and send it directly only to people who agreed to receive it.
- ☐ Send 2 personalised partnership pitches (for example, one consultancy and one association) using the script and tips in this chapter.
- ☐ Check the official Summit website for registration and volunteer options, and write down dates, costs and contacts in a one-page plan.
- ☐ Practise your 30-second introduction out loud in Portuguese and English until you can say it without reading.

Proof: Send me (Claude) the link to your positioning post, a screenshot or PDF of Radar #1, the two pitch emails as sent, and your one-page Summit plan. Save them all in a folder called 'Proof - Claim Your Crown'.

Bonus (optional, harder): Get a reply from one partner and book a 20-minute call, or record a 60-second video of your bilingual introduction and post it.

☐ **Challenge complete.** Date: _____ XP added to the tracker

QUICK QUIZ · CHAPTER 11

1. Which line best shows a 'category of one'?

- A** I do websites, logos, posts and translation for everyone
- B** The supplier-readiness studio for Mozambique's gas and mining supply chain
- C** The cheapest web designer in Maputo

2. You want to write a post with the exact Law 9/2026 thresholds. What should you do first?

- A** Copy the numbers from the first news article you find
- B** Read the official Boletim da República text and verify the numbers
- C** Use the numbers from the earlier bill, since they are similar

3. A consultancy sends you a client. How do you handle the referral fee?

- A** Pay it secretly so the client does not ask for a discount
- B** Refuse all referral fees
- C** Pay it and make sure the client knows about it
- D** Pay the client's procurement contact instead

Answers are at the back of the book. Check yourself only after you've answered all three.

Run Yourself Like a Company

Metrics, rhythm, money and the 12-month road

IN THIS CHAPTER YOU WILL

- Run a weekly CEO hour and read your own business numbers
- Organise your day in time blocks that protect your energy and health
- Respond to rejection and slow weeks by changing one variable at a time
- Manage business money: separate accounts, a money log, fixed pay, an emergency fund and a tax set-aside
- Follow a 12-month roadmap, and say no to bad clients and bad deals

Here is a truth nobody tells you when you start alone: you are now the boss, the employee, the accountant and the cleaner. Nobody will check if you sent your 20 outreaches today. Nobody will tell you to stop working at 23:00. Freedom feels wonderful on Monday. By Wednesday, when nobody replies, it can feel very heavy.

That is why this last chapter is about you. Not about clients, not about documents. About how you run yourself. A company has a weekly meeting, clear numbers, a budget, a plan and rules. You will have the same, even if the company is only one person with a laptop.

I will show you the weekly CEO hour, a daily rhythm that protects your energy, how to treat rejection as data, how to manage money so it does not disappear, and a 12-month roadmap. At the end there is a final boss: a 30-day sprint. I believe you can finish it. Not because it is easy, but because you will follow a system.

— your mentor

12.1 The weekly CEO hour

Every Friday, for one hour, you stop working **in** the business and work **on** the business. This is your **CEO hour (hora do diretor)**. You look at your numbers, decide what to change, and plan next week. Keep everything in one simple spreadsheet called your **scoreboard (quadro de resultados)**.

The seven numbers on your scoreboard

Metric	What it counts
Outreaches	Value-first messages sent
Replies	Any answer, yes or no
Calls	15-minute calls done
Proposals	Proposals sent
Deposits	Deposits confirmed in your app
Pipeline value	Total MT of open proposals
Cash	Money in the business account

The CEO hour agenda

- 1 Spend 10 minutes updating the scoreboard with this week's numbers.
- 2 Spend 10 minutes on simple ratios, for example replies divided by outreaches.
- 3 Spend 15 minutes writing what worked and what did not, three lines each.
- 4 Spend 15 minutes choosing ONE thing to change next week.
- 5 Spend 10 minutes preparing Monday's list of companies, so Monday starts fast.

EXAMPLE

Practice numbers (invented, only to practise the maths)

Imagine a week with 100 outreaches, 6 replies, 2 calls, 1 proposal for Supplier-Ready and 0 deposits. Your reply ratio is 6 out of 100. Your **pipeline value (valor em negociação)** is 65,000 MT, because one proposal is still open.

The lesson is not 'I failed'. The lesson is: 'The weak point is between replies and calls. Next week I will improve how I ask for the call.' These numbers are only an exercise. Your real numbers will be different.

12.2 Daily rhythm, energy and health

A sample weekday (adjust it to your life)

Time	Block	Output
07:30-08:00	Plan the day	Top 3 tasks written
08:00-10:30	Outreach	20 value-first messages
10:30-11:00	Break	Walk, water, food
11:00-13:00	Delivery	Client work
13:00-14:00	Lunch	A real meal, away from the screen
14:00-15:30	Follow-ups and calls	Day 3 and Day 7 follow-ups
15:30-16:30	Content and Radar	1 post or Radar notes
16:30-17:00	Learning	30 minutes of study

Outreach goes first in the morning because it is the task you will most want to avoid. Do the hard thing while your energy is high. Delivery comes right after. Chapter 1 showed delivery first; both orders work. When a client deadline is close, swap the two blocks, because paying clients come before everything else.

Protect your energy

- Sleep at the same time most nights. A tired brain writes bad emails.
- Eat real meals. Do not live on bread and soft drinks while you work.
- Take a short break every 90 minutes: stand up, walk, drink water.
- Put your phone on silent during outreach and delivery blocks.
- Take one full day off every week. Rest is part of the job.

A NOTE FROM YOUR MENTOR

Here is a pattern I want you to avoid. Someone works 14 hours a day for two weeks, gets no deposit, feels empty, and quits. Someone else works 7 focused hours a day for two months, and builds something. Your business must survive a bad week. Build a rhythm you can keep.

— your mentor

12.3 Rejection, slow weeks and the learning plan

“

Rejection is not a verdict on you. It is data about your message.

Most people you contact will not reply. Some will say no. A 'no' is final: thank them and do not contact them again. But a slow week is information. Your job is to read it calmly, like an engineer reads a broken machine.

What to do in a slow week

- 1 Check the basics: did you really send 20 outreaches every weekday and do the Day 3 and Day 7 follow-ups?
- 2 If not, the problem is volume. Fix that first, before you change anything else.
- 3 If yes, choose ONE variable to change: subject line, first sentence, city, sector, or the question that asks for the call.
- 4 Keep everything else the same for one full week.
- 5 Compare the numbers in your next CEO hour. Keep the change if it helped. Try the next variable if it did not.

TIP

Change one thing at a time. If you change the subject, the sector and the city in the same week, you will never know which change made the difference.

30 minutes of learning a day

Day	Topic	Example
Monday	Procurement	Read one real EOI PDF fully
Tuesday	Writing	Rewrite one paragraph shorter
Wednesday	Design	Study the layout of a good profile
Thursday	Sales	Practise the H5 call script out loud
Friday	Credential	HubSpot Inbound (about 3 hours total)

12.4 Money management

Six money rules

- 1 Separate business money: use one bank account or one mobile money wallet only for the business.
- 2 Keep a money log: date, client, amount, method, and the receipt number with your NUIT.
- 3 Pay yourself a fixed amount every month, the same amount, even in a good month.
- 4 Build an emergency fund (fundo de emergência) before you buy anything nice.
- 5 Set aside money for tax from every payment, and confirm the real amount with the tax authority (AT) or an accountant.
- 6 Reinvest in tools that pay back: a domain, data bundles, and later a better laptop.

EXAMPLE

Fictional example: one Supplier-Ready payment

Imagine 65,000 MT arrives for a project. It goes into the business account, not your pocket. From there you take: a tax set-aside (the amount your accountant confirms), your fixed monthly pay (an amount you choose and keep stable, for example 15,000 MT), a part for the emergency fund, and a small part for tools. What remains stays in the business for slow months. The exact split is your decision. The habit is what matters.

WATCH OUT

The simplified tax for small taxpayers (ISPC, Imposto Simplificado para Pequenos Contribuintes) was reportedly changed recently (Law 9/2025), but the rates and thresholds are not verified. Ask the AT or an accountant before you calculate anything. For large B2B payments, use bank transfer with a receipt that shows your NUIT. An individual M-Pesa account has a daily limit of 200,000 MT. Always confirm payments in your own app, never from a screenshot.

When to raise prices: after proof. A good moment is after 3 happy clients with written testimonials. The launch price for the first 3 clients was real scarcity, so ending it is honest. Raise prices for new clients only, keep your word to current clients, and announce it in advance. If someone cannot pay, offer a smaller package, a **downsell (oferta mais pequena)**, instead of a discount.

SCRIPT · COPY, PERSONALISE, SEND**Announcing the end of the launch price**

Bom dia, Sr. [Apelido]. Uma informação rápida: o preço de lançamento para os três primeiros clientes terminou. A partir de [data], o pacote Supplier-Ready passa a custar [novo preço] MT. As propostas já enviadas mantêm o preço até ao fim do prazo de validade indicado. Fico ao dispor para qualquer esclarecimento.

12.5 The 12-month roadmap

Milestones (targets, not promises)

Target	Milestone	Proof
Month 1	First deposit	Money in your own app
Months 2-3	3 clients + case studies	Written permission + testimonials
Months 3-4	First retainer	Signed 3-month agreement
Months 4-5	Raise prices	New price list in use
Months 5-6	Templates and SOPs	Faster delivery
Months 6-9	First subcontractor	One designer, one written agreement
Months 9-12	Consider an Lda	Accountant's advice
Month 12	Reference name	Partners send you clients

SOPs (procedimentos operacionais padrão) are written step-by-step instructions for work you repeat: onboarding, the 7-day plan, quality control, handover. Every time you deliver, improve the SOP a little. After five projects, delivery is faster and calmer, and someone else could follow it.

TIP

Bring in a freelance designer only when you have more work than time. Start with one small paid job and a short written agreement that includes confidentiality. Always check the quality yourself before the client sees it. The client trusts you, not the subcontractor.

Think about registering a company (**sociedade por quotas, Lda**) when your income is regular, not on day one. An accountant can explain the costs and obligations for your situation. Some big clients may prefer a registered supplier, but many companies first ask for a factura or recibo with your NUIT.

12.6 Saying no, and who you have become

Signs of a bad client or a bad deal

- Asks you to inflate their HSE record, capabilities or ownership
- Refuses the 50% deposit 'because we are a big company'
- Wants a guarantee that they will win a contract
- Suggests a payment to someone to 'get on the vendor list'
- Offers to pay by a strange method, or asks you to pay a 'fee to receive'
- Asks for free work again and again, or treats you with disrespect

SCRIPT · COPY, PERSONALISE, SEND

A polite, firm no

Exmo. Sr. [Apelido], agradeço muito o vosso interesse e a confiança. Infelizmente, não posso incluir nos documentos informação que não esteja comprovada, porque isso pode prejudicar a vossa empresa nos processos de selecção de fornecedores. Se preferirem trabalhar apenas com factos documentados, terei todo o gosto em ajudar. Caso contrário, desejo-vos muito sucesso.

A NOTE FROM YOUR MENTOR

Look back at Chapter 1. You started with a laptop, two languages, no contacts and no portfolio. Now you know how a supply chain works, what an EOI asks for, how to start a conversation with a director, how to write a proposal, how to deliver in 7 days, and how to protect your name. Whatever your scoreboard says this month, you are not the same person who opened this book. You are someone who builds.

— your mentor

Clients pay for documents. They come back for the person who never cut a corner.

KEY TAKEAWAYS

- ✓ Every Friday, hold a CEO hour: update the scoreboard, choose one change, plan Monday.
- ✓ Do outreach first in the morning, protect your sleep, and take one day off a week.
- ✓ Rejection is data: check volume first, then change one variable at a time.
- ✓ Separate business money, pay yourself a fixed amount, and confirm tax with the AT or an accountant.
- ✓ Raise prices only after proof, and build SOPs so delivery gets faster.
- ✓ Saying no to bad clients protects your business and your name.

CHALLENGE 12**+300 XP**

The 30-Day Sprint (Final Boss)

For 30 days you run yourself like a real company. You do the daily outreach, the weekly CEO hour, the calls, the proposals and at least one delivery, and you track everything. At the end you send me your scoreboard, and we read it together.

Time box: 30 days **Reward:** 300 XP

YOUR MISSION, STEP BY STEP

- ☐ Create your scoreboard in a free Google Sheet with the seven metrics from this chapter, one row per day.
- ☐ Send 20 value-first outreaches every weekday within the safety limits: about 30 cold emails per day maximum, WhatsApp permission first, no more than 15 new WhatsApp contacts per hour, and a 'no' is final.
- ☐ Do every Day 3 and Day 7 follow-up on the same email thread.
- ☐ Hold your CEO hour every Friday, and write down your one change for the next week.
- ☐ Book and complete at least 5 calls using the H5 script.
- ☐ Send at least 3 proposals, each within 30 minutes of the call.
- ☐ Deliver 1 project or pilot using the 7-day plan from Chapter 10.

Proof: Send me (Claude) your final scoreboard, your Friday CEO-hour notes, and one delivered file (with the client's permission, or your own pilot). Save everything in a folder called 'Proof - 30-Day Sprint'.

Bonus (optional, harder): Close one Monthly Growth Retainer or collect one written testimonial with permission to publish, and write a one-page SOP for the part of your work you repeated most.

☐ **Challenge complete.** Date: _____ XP added to the tracker

QUICK QUIZ · CHAPTER 12

1. In a slow week you sent only 40 outreaches instead of 100. What should you change first?

- A The subject line
- B The target sector and city
- C The volume: get back to 20 outreaches every weekday
- D Your prices

2. A client pays 65,000 MT. What is the best first move?

- A Spend it on a new laptop to celebrate
- B Put it in the business account, log it, and split it by your money rules
- C Keep it in your personal wallet with your other money

3. When is a good moment to raise your prices?

- A After your very first enquiry
- B After proof, for example 3 happy clients with written testimonials
- C Never, because low prices win more clients
- D Whenever a client asks for a discount

Answers are at the back of the book. Check yourself only after you've answered all three.

Your XP tracker

Tick each challenge when you've finished it and saved the proof, then add up your XP to find your level.

Done	Ch.	Challenge	XP
☐	1	Build Your Command Centre	100
☐	2	Scam Detector + Money Map	150
☐	3	Map the Battlefield	200
☐	4	Write your offer sheet	200
☐	5	Proof sprint	250
☐	6	Set up the machine	200
☐	7	Build Your First 25	200
☐	8	First Contact	250
☐	9	Close One	300
☐	10	Ship It	250
☐	11	Claim Your Crown	300
☐	12	The 30-Day Sprint (Final Boss)	300
Total available			2,700

My XP so far: _____ My level: _____

Level	Name	XP	What it means
1	Apprentice	0–400	You've set up, learned the market and spotted the traps.
2	Operator	401–900	You have an offer, proof and a working toolkit.
3	Closer	901–1,500	You find leads, start conversations and run sales calls.
4	Specialist	1,501–2,200	You deliver professional work and build your reputation.
5	Market Leader	2,201+	People recommend you by name. You run yourself like a company.

Quiz answers

Chapter 1 • Day Zero: How This Mentorship Works

- 1. C:** 65,000 MT. Supplier-Ready is 65,000 MT. 270,000 MT is the ambitious monthly target, not the price of one sale.
- 2. B:** Check every name, number and fact against the source, then send it yourself. You are the final checker. Claude can make mistakes, so you verify every fact before anything leaves your account.
- 3. B:** Closer. Closer covers 901 to 1,500 XP. Operator ends at 900, and Specialist starts at 1,501.

Chapter 2 • How Money Really Works (and the Traps That Eat Beginners)

- 1. B:** Confirm in your own M-Pesa app or SMS that the money arrived. Screenshots can be fake. Only your own app or SMS proves the money is in your account.
- 2. B:** 62,000 MT. Profit is revenue minus costs: 65,000 MT minus 3,000 MT equals 62,000 MT.
- 3. B:** A red flag: stop. Paying to receive money is a classic scam pattern. Never pay a 'fee to receive'.

Chapter 3 • Your Market: Gas, Mining and the Companies That Need You

- 1. B:** A public notice where a buyer asks which companies can do certain work. An EOI is an early public step by the buyer. Companies respond with documents to show they can do the work.
- 2. A:** Under 90 days old. The certificate must be under 90 days old, so always check the date before you include it.
- 3. B:** Say no, and explain that you complement their training by producing finished bilingual documents. Honesty protects your reputation. You complement free programmes; you never claim to be part of them.

Chapter 4 • Your Offer: What You Sell and How to Price It

- 1. B:** Offer Portal-Ready alone at 25,000 MT. Downsell: reduce the scope and keep your price honest. Discounting the same work teaches clients that your prices are not real.
- 2. A:** Local price lists put websites at 5,000-35,000 MT, so the director will compare you with them. If you say 'website', you compete on price. Selling readiness for contracts shows the real value.
- 3. C:** Deposit refunded if you do not approve the first draft, plus unlimited revisions until portal submission. You guarantee your own work. Contracts and certification depend on buyers and accredited entities, not on you.

Chapter 5 • Proof From Zero: Credibility Without Experience

- 1. B:** Claim it with a free Netlify account so it does not expire. An unclaimed Netlify Drop site can expire. Claiming it with a free account keeps your demo online.
- 2. A:** A discount in exchange for written permission to publish before/after examples and a testimonial. Pilots get the same quality and guarantee. The discount pays for the proof they allow you to use.
- 3. C:** Refuse politely and present their real strengths well. Inflating capabilities is misrepresentation in procurement. It can get the client excluded and destroy your reputation.

Chapter 6 • Your Toolkit: Setup, Legal and Getting Paid

- 1. A:** 2026-10-05_LufoLogistica_CapStatement_v2.pdf. Date first, then client, document and version. Files sort in order and you never send the wrong draft.
- 2. B:** Confirm the money in your own M-Pesa app or SMS before starting. Screenshots can be fake. Only money you can see in your own account is real.
- 3. C:** The tax authority (AT) or an accountant. The ISPC details in this book are unverified. Always confirm tax rules at the source.

Chapter 7 • Finding Clients: A Lead List With Money

- 1. B:** A prospect is a lead you checked: it fits, shows money and has a gap you can fill.. A lead is just a name. It becomes a prospect after you check its fit, its money signals and its gap.
- 2. C:** Remove it: a wrong sector is removed whatever the score.. The salon scores 4, but hair salons are not suppliers for gas and mining projects. If sector fit is 0, the company leaves the list.
- 3. C:** Ask the reception politely for the name and the best professional email.. Use only professional contacts the company publishes or gives you. Buying lists, scraping and private numbers break trust and privacy.

Chapter 8 • Outreach: Messages That Get Replies

- 1. B:** 'Vi que a Lufo Logística está a contratar motoristas e tem frota própria em Pemba.'. A good first line is about them and proves you looked at their company. Your name belongs in the signature.
- 2. B:** Ask permission first, add no more than about 15 new contacts per hour, and never send identical texts.. Permission first, small volume and personal texts protect your number, especially with WhatsApp's limits on unanswered messages to non-contacts.
- 3. B:** Thank them, mark 'Do not contact' and never message again.. A 'no' is final. A polite thank-you protects your reputation in a small business community.

Chapter 9 • Sales Calls and Closing

- 1. B:** Stay silent and let the director think.. Silence gives the director time to decide. Talking too soon often leads to giving away value.
- 2. B:** Offer Portal-Ready (25,000 MT) as a smaller start.. Downsell, do not discount. A smaller package keeps your prices honest and still helps the client.
- 3. B:** Confirm the money in your own M-Pesa SMS or app.. Screenshots can be fake. Only money you see in your own account or SMS is confirmed.

Chapter 10 • Delivering Like a Professional

- 1. B:** Check your own app, SMS or bank statement, and start only when the money is there. Fake payment receipts are a common scam. Only your own app, SMS or bank statement proves that the money arrived.
- 2. C:** The client types their own password on a screen-share; you never ask for it or store it. The client must stay in control of their accounts and submissions. You guide, they type, and nothing is submitted without their approval.
- 3. B:** Scope creep, so you finish the current work and offer a separate proposal. New work that was never agreed is scope creep. Say yes to the person, protect your timeline, and send a separate proposal.

Chapter 11 • Becoming #1 in Mozambique

- 1. B:** The supplier-readiness studio for Mozambique's gas and mining supply chain. It is narrow, clear about who it serves and why it matters, and hard to compare with a general web designer.
- 2. B:** Read the official Boletim da República text and verify the numbers. Sources disagree on the thresholds, so only the official text is safe to quote. Also say it is a plain-language summary, not legal advice.
- 3. C:** Pay it and make sure the client knows about it. A disclosed referral fee is honest business. Hidden payments, or payments to people inside the buyer, cross the ethics wall.

Chapter 12 • Run Yourself Like a Company

- 1. C:** The volume: get back to 20 outreaches every weekday. If the volume is low, you cannot judge the message. Fix the basics first, then change one variable at a time.
- 2. B:** Put it in the business account, log it, and split it by your money rules. Separate business money and a money log are the base of everything: fixed pay, tax set-aside, emergency fund and reinvestment.
- 3. B:** After proof, for example 3 happy clients with written testimonials. Raise prices after proof, for new clients only, and announce it in advance. Offer a smaller package instead of a discount.

Glossary

Every business word in this book, with the Portuguese term you'll hear from clients.

Term	Português	What it means
Capability statement	Perfil de capacidades	A short document that shows what a company can do, with proof.
Case study	estudo de caso	A short before/after story of a real job, approved by the client.
Cash flow	Fluxo de caixa	How money moves in and out of your account over time.
Category of one	Categoria única	Describing your work so narrowly that you have no direct comparison.
Closing question	pergunta de fecho	A question that asks for a clear next step, like sending the proposal today.
Cold outreach	prospecção a frio	Contacting a company that does not know you yet.
CRM	gestão de relacionamento com clientes	A list that tracks every company you contact and its stage in your process.
CRM / tracker	gestão de relação com clientes / folha de acompanhamento	A simple sheet where you record every company, its score and your next action.
Decision maker	decisor	The person who can say yes and approve the payment.
Deliverability	entregabilidade	Your messages reaching the inbox and your number staying unblocked.
Deposit	Sinal / adiantamento	Part of the price paid before you start the work.
Discovery questions	perguntas de diagnóstico	Questions that help the client describe their problem in their own words.
Downsell	Oferecer um pacote menor	Offering a smaller package at its honest price instead of giving a discount.
Due diligence	Diligência prévia	Careful checking of a company or platform before you trust it.
Emergency fund	Fundo de emergência	Money kept aside only for slow months or surprises.
Expression of interest (EOI)	Manifestação de interesse	A public notice where a buyer asks which companies can do certain work.

Term	Português	What it means
Final investment decision (FID)	Decisão final de investimento	The moment the owners formally commit the money to build a big project.
Follow-up	seguimento	A short, polite message after your first one when there is no reply.
Funnel	Funil de vendas	The path from many contacts to a few sales, step by step.
Handover	Entrega final	The moment you give the client all final files and accounts and close the project.
Incubator	Incubadora	A programme that supports young businesses with training, mentors and contacts.
Invoice / receipt	factura / recibo	The document a company needs before or after paying you, showing your NUIT.
ISPC	Imposto Simplificado para Pequenos Contribuintes	A simplified tax regime for small taxpayers; confirm the rates with AT.
Lead	contacto potencial	Any company that might need your service, before you check it.
LNG	GNL (gás natural liquefeito)	Natural gas cooled into a liquid so ships can carry it.
Local content	Conteúdo local	The share of a project that uses national companies, workers and goods.
Misrepresentation	declaração falsa	Giving false information about a company's capabilities, record or ownership.
Money log	registo de entradas e saídas	A simple sheet where you record every payment you receive and make.
Money signal	sinal de dinheiro	Public evidence that a company can pay, such as hiring or owning a fleet.
Objection	objecção	A reason the client gives for not buying now, often a hidden question.
Offer ladder	escada de ofertas	A set of offers from free to expensive that lets a client trust you step by step.
Onboarding	integração do cliente	Welcoming a new client and collecting everything you need to deliver.
Outreach	Prospecção	Contacting companies that do not know you yet, to start a conversation.

Term	Português	What it means
Personal brand	marca pessoal	How people see and recognise you professionally across all your channels.
Pilot client	cliente piloto	One of your first 2-3 clients, who gets a discount in exchange for permission to use the results as proof.
Pipeline value	Valor em negociação	The total value of proposals that are still open and could still close.
Positioning	Posicionamento	The clear place your business holds in a client's mind.
Prequalification	Pré-qualificação	The buyer's check that a company meets the minimum requirements.
Price anchor	âncora de preço	A higher real price shown first, so the next offer feels reasonable by comparison.
Private limited company (Lda)	Sociedade por quotas, Lda	A registered company form to consider when your income is regular, with an accountant's advice.
Procurement	Aquisições	The process a company uses to choose and buy from suppliers.
Profit	Lucro	Revenue minus all your costs.
Prospect	cliente potencial qualificado	A lead you checked: it fits, it shows money, and it has a gap you can fill.
Qualification	qualificação	Checking if a lead is worth your time before you contact it.
Quick reply	resposta rápida	A saved WhatsApp Business message you send by typing a shortcut like /pagar.
Referral fee	Comissão de referência	A payment to a partner who sends you a paying client, always disclosed to the client.
Reply rate	taxa de resposta	Replies divided by messages sent, times 100.
Retainer	Avença mensal	A fixed monthly fee a client pays for ongoing work.
Revenue	Receita	The money that comes from your sales.
Revision	Revisão	A correction or change inside the work you already agreed to deliver.
Scope creep	Aumento do âmbito	When a client asks for extra work that was not part of the agreed price.
Scoreboard	Quadro de resultados	One sheet where you track your key business numbers every day.

Term	Português	What it means
Standard operating procedure (SOP)	Procedimento operacional padrão	Written step-by-step instructions for work you repeat, so it is done the same way every time.
Subcontractor	Subcontratado	A freelancer you pay to do part of a project, while you stay responsible for quality.
Subject line	assunto	The title of your email, the first thing the director reads.
Supplier	Fornecedor	A company that sells goods or services to another company.
Supply chain	Cadeia de fornecimento	All the companies that together deliver what a big project needs.
Tax number (NUIT)	Número Único de Identificação Tributária	Your personal tax number, which companies need to see on your receipts.
Testimonial	testemunho	A short statement in the client's own words about your work.
Tier	Nível	A layer of the supply chain, from operator to main contractor to subcontractor.
Value-based pricing	preço baseado no valor	Setting your price by what the result is worth to the client, not by your hours.
Value-first	valor primeiro	Giving something useful for free before asking for anything.

Your toolkit: files you already have

File	What it's for
high-ticket/high-ticket-sprint.pdf	Your 24-hour high-ticket plan: offers, schedule, scripts and tracker
high-ticket/scripts-high-ticket.md	Every script (H1–H9) and Claude prompt (P1–P5), ready to copy
high-ticket/demo-site.zip	Your demo website (fictional company). Unzip it and drag the folder into Netlify Drop
high-ticket/demo-site/company-profile.pdf	Sample capability statement (fictional company), your template
high-ticket/escapepay-and-number-one.pdf	EscapePay verdict and the 30-day plan to become #1
24h-cash-sprint.pdf	Backup plan for fast small jobs (CVs, WhatsApp Business setups, posts)

A last word

You started this book with a laptop, two languages and a lot of ambition. That's more than most people start with.

The difference between people who talk about business and people who build one is boring and simple: they do the small things every day. Twenty messages. One honest follow-up. One more draft. One more call. Nobody sees that work. Then one day, everyone sees the result.

Protect your name. In a market this small, your reputation is the only asset that grows while you sleep. Never fake proof, never promise what you can't control, and always deliver a little more than you promised.

When you finish a challenge, show me. When you're stuck, tell me. When you win your first client, I want to hear about it. Let's get to work.

— your mentor, Claude
